ACKNOWLEDGEMENTS

The Department of Transport wishes to extend its sincere thanks to the organisations that supplied the data for inclusion in the Annual Transport Statistics Bulletin: 2023. In alphabetical order they are:

Airports Company of South Africa

Association of Motorcycle Importers and Distributors

Cross Border Road Transport Agency

Department of Energy

Gautrain Management Agency

National Association of Automobile Manufacturers of South Africa

Port Regulator Authority

Passenger Rail Agency of South Africa

Road Traffic Management Corporation

South African Airways

South African Civil Aviation Authority

South African National Roads Agency Limited

South African Petroleum Industry Association

Statistics South Africa

The World Bank

Transnet Freight Rail

Transnet National Port Authority

Transnet Pipelines

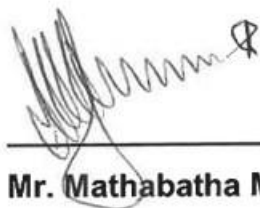

United Nations Conference on Trade and Development

Comments, requests for additional information and enquiries can be directed to the Statistical Analysis Directorate at MlotsaH@dot.gov.za or Tel: +27 (0) 12 309 3190.

FOREWORD

This is the 2023 edition of the Transport Statistics Bulletin. The main aim of the Transport Statistics Bulletin is to compile statistical information from various sources in the transport sector into a comprehensive bulletin for use by policymakers, industry players, transport analysts and the wider South African community. The publication covers a wide variety of statistics for all modes of transport, which include aviation, road, rail, maritime and pipelines. It consists, *inter alia*, of a series of information on passenger volumes, ports operations, live vehicle population, road safety, airports and many other topics that may be of interest to the transport sector.

The statistics covered in the bulletin were collected to a large extent from government departments and government agencies in the transport sector. Since the Bulletin is a compendium of transport statistics, it seeks to be a one-stop source of statistical information enabling users to make a comparison of trends across modes in respect of transport indicators. We trust that it will continue to be a useful source of information to the wide spectrum of users in the transport sector.

A handwritten signature in black ink, appearing to read 'Mathabatha Mokonyama', written over a horizontal line.

Mr. Mathabatha Mokonyama

Acting Director-General: Transport

Date: 17 June 2023

EXECUTIVE SUMMARY

INTRODUCTION

The objective of the Transport Statistics Bulletin is to provide a comprehensive publication of transport statistics which give a coherent summary of transport activity in South Africa.

This section seeks to present selected high-level transport indicators. It is based solely on information that the Department of Transport was able to get from various stakeholders in the transport sector. The summary of results follows the sequence of the sections that are in the bulletin.

GENERAL TRANSPORT RELATED TRENDS

Employment in the transport sector increased slightly by 4.2% in the fourth quarter of 2023 when compared to the same period in 2022. The transport sector contribution amounted to 6.1% of the total formal sector employment in fourth quarter of 2023 (Stats SA).

Infrastructure Expenditure

Audited expenditure outcomes in other spheres of Government, agencies and departments indicated an increase of 25.1% in spending on infrastructure to R41.6 billion in 2022/23 financial year.

Freight Estimates

The payload transported on rail increased by 2.7% to 160.3 million tons in 2023 from 156.1 million tons in 2022, while that of roads increased by 1.2% to 862.5 million tons in 2023 from 852.6 million tons in 2022. The proportion of payload transported on road stood at about 65%.

ROADS

Infrastructure

Approximately R10.7 billion was spent on provincial roads maintenance in the financial year 2022/23. This amounts to a decrease of about 9.8% from the previous financial year. The Kwazulu-Natal province received the highest allocation of more than R2 billion, followed by Eastern Cape with R1.4 billion.

Vehicle Population and Licensing

Live vehicle production in South Africa increased by 1.30% to approximately 13.13 million in 2023 from 12.96 million units in 2022. The number of driving licences issued in South Africa increased by 3.4% to 14.9 million in 2022.

Road Safety

South African roads had 156 fatal crashes and 252 in the Easter period of 2023, which amount in an increase of 33% and 37% respectively.

Cross Border

The goods permit issued by the Cross-Border Road Transport Agency (CBRTA) in South African borders increased by 1.3% to 59 971 in 2022/23 from 59 194 in 2021/22. The same trend was observed for bus passenger permits issued in that they increased by 26.3% to 1 099 in 2022/23 from 870 in 2021/22.

MARITIME

Cargo Handled at South African Ports

The total annual cargo handled by South African ports decreased by 0.03% to 210.6 million metric tons in 2023 from 210.7 metric tons in 2022. Similarly, the annual bulk cargo handled at South African ports decreased by 5.5% to 199.1 million metric tons in 2023.

AVIATION

Licensing and Registration

The licensing and registration demographic picture reveals that most students who enrolled for aviation courses were from the white population group (1 504), followed by Africans (639) and Indians (111). In addition, whites had the highest number of licenses issued to them for both aeroplanes (7 638) and helicopters (1 639) when compared to the other population groups.

Air traffic

Passenger volumes at ACSA airports increased by 3.2% to 39.88 million in 2022/23. OR Tambo (15.6 million) recorded the highest number of passenger volumes, followed by Cape Town (8.4 million), Durban (4.3 million) and Port Elizabeth (1.2 million). On the contrary, Upington (49.8 thousand) record the lowest number of passenger volumes (ACSA).

Air Safety

There was a 15% decline in aircraft accidents to 140 in 2023. Fatal accidents increased by 17% to 14 in 2022/23 from 12 in 2021/22. Serious accidents and fatalities declined by 69% and 29% respectively (SACAA).

RAIL

Passenger rail information

The Metrorail passenger volumes decreased by 6.4% to 15.6 million in the 2022/23 financial year from 16.69 million in 2021/22. The performance indicators in the same reference period show that the percentage of trains that were on time was 77.3% while that of trains delayed and cancelled were 76% and 11% respectively (PRASA).

In 2022/23 financial year, there was 64.5% increase in passenger volumes transported by the Gautrain from 4.3 million in 2021/22 to 7.1 million (GMA).

Rail Safety

The number of accidents in passenger rail operations recorded in 2023/23 financial year were 34, which was higher than the previous financial year. (PRASA).

PIPELINES

The volumes of petroleum products decreased for the period of six years from 16,3 billion litres in 2018 to 15,5 billion litres in 2023 (Transnet).

Total	16 497	16 411	15 024	14 544	15 934	16 723	5.0

Note: Due to rounding, numbers do not necessarily add to totals

Source: Statistics South Africa (Stats SA)

Table 1.1 shows that the overall formal sector employment increased by 5.0% to approximately 16.7 million in 2023 when compared to the fourth quarter of 2022. Furthermore, in the fourth quarter of 2023, employment in the transport sector slightly increased by 4.2% when compared to the last quarter of 2022.

Figure 1. 1: Annual Employment in the Transport Sector ('000), 2023

Source: Statistics South Africa (Stats SA)

Figure 1.1 shows that in 2020, the annual employment in the transport sector dropped drastically, however, it picked up in 2023.

Table 1.4 shows motor trade sales at current prices for the period 2018 - 2023. Motor trade sales increased by 4.4% in 2023 to a region of R928 billion from R889 billion in 2022.

Figure 1. 4: Percentage change in Motor Trade Sales at current prices

Source: Statistics South Africa (Stats SA)

Figure 1.4 shows that there was a downturn in motor trades sales in 2020 with a significant decline of 16.7%, thereafter, sales increased at the decreasing rate.

Table 1. 5: Contribution of each type of activity to the percentage change in motor trade sales

Type of activity	Oct to Dec 2022 (R'million)	Weight	Oct to Dec 2023 (R'million)	% change Between Oct to Dec 2022 & Oct to Dec 2023	Contribution (% points) to the total % change
New vehicle sales	56 718	24.1	56 110	-1.1	-0.3
Used vehicle sales	43 523	18.5	44 912	3.2	0.6
Workshop income	9 645	4.1	9 136	-5.3	-0.2
Income from the sales of accessories	43 252	18.4	47 719	10.3	1.9
Income from fuel sales	76 807	32.6	79 376	3.3	1.1
Income from convenience store sales	5 303	2.3	5 766	8.7	0.2
Total	235 247	100	243 019	3.3	3.3

Source: Statistics South Africa (Stats SA)

Table 1.5 illustrates that the overall change in contribution of each type of activity in the fourth quarter of 2023 increased by 3.3%. This was as a result of positive contributions by all the types of motor trade sales, with an exception of new vehicle

sales and workshop income which had a negative contribution of 0.3% and 0.2%, respectively.

Table 1.9 above shows the average percentage of productive capacity utilization in the automotive production plants in South Africa from 2018 to 2023. The production capacity utilization increased for all motor vehicles in 2022. Cars and light commercials production capacity utilisation increased by over 2 percentage points, while that of medium and heavy commercials increased by over 20 percentage points. However, in 2023, the average percentage of productive capacity utilization increased across all motor vehicles in the production plants, with an exception of medium and heavy commercials which decreased by 10.6 percentage point.

	% Change	4	0	6	-15	- 7	- 11	- 6	- 17	- 22	- 7
	Year	EC	FS	GP	KZN	LP	MP	NC	NW	WC	RSA
Fatalities	Festive 2021/22	231	129	291	300	231	194	65	142	225	1 808
	Festive 2022/23	248	125	295	258	191	191	53	95	149	1 560
	% Change	7.4	16	1.4	-14	-17.3	-24.7	-18.5	-33.1	-33.8	-13.7

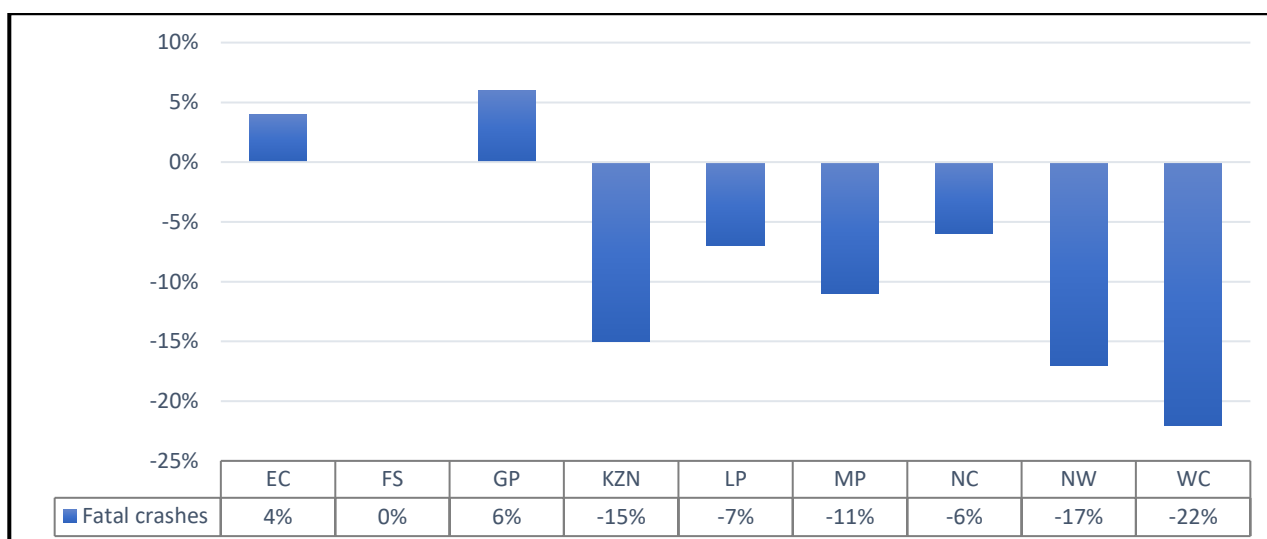

Note: Festive 2020 = 1 Dec 2020 to 11 Jan 2021 & Festive 2021 = 1 Dec 2021 to 11 Jan 2022

Note: GP=Gauteng, KZN=Kwazulu-Natal, WC=Western Cape, EC= Eastern Cape, FS=Free State, MP=Mpumalanga, LP=Limpopo, NC=Northern Cape

Source: Road Traffic Management Corporation (RTMC)

The festive season for 2022/23 had 1 299 fatal crashes and was responsible for 1 560 fatalities. Fatal crashes decreased by 7% from the 2021/22 to the 2022/23 festive period. Fatalities decreased by 14% from 1 808 in 2021/22 to 1 560 in 2022/23 festive period. Gauteng had the highest number of fatal crashes (277) and fatalities (295) as indicated in Table 2.16.

Figure 2. 14: Percentage change in fatal crashes, Festive 2021 to Festive 2023

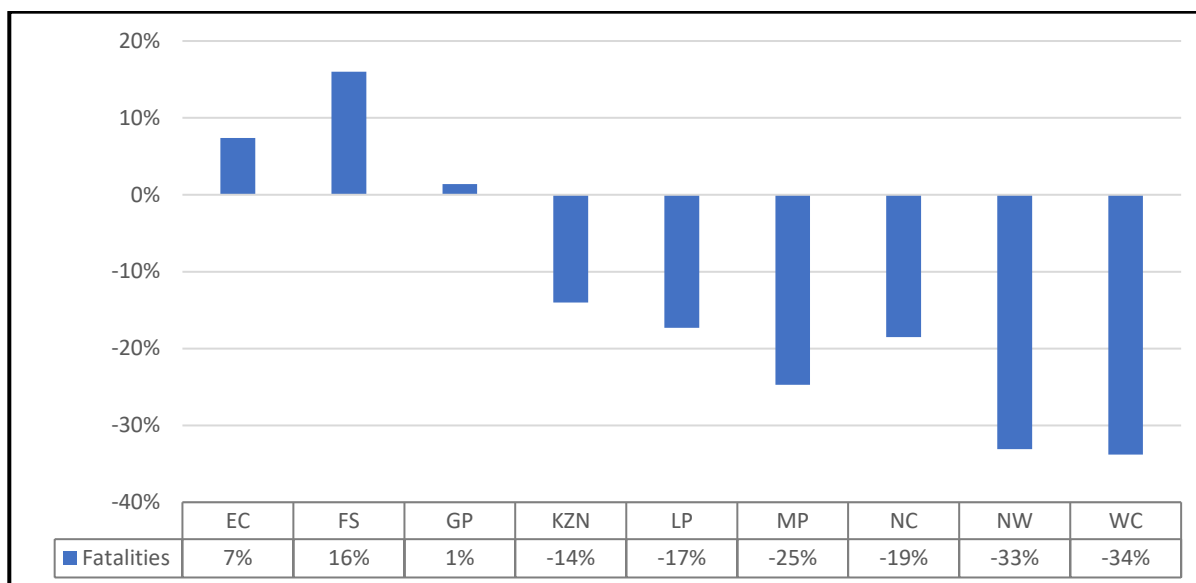

Note: Festive 2020 = 1 Dec 2020 to 11 Jan 2021 & Festive 2021 = 1 Dec 2021 to 11 Jan 2021

Source: Road Traffic Management Corporation (RTMC)

Figure 2.14 shows that fatal crashes increased in EC and GP by 4% and 6%, respectively, while that in the other provinces decreased.

Figure 2. 15: Percentage change in fatalities, Festive 2021 – Festive 2023

Note: Festive 2020 = 1 Dec 2020 to 11 Jan 2021 & Festive 2021 = 1 Dec 2021 to 11 Jan 2022 Note: GA=Gauteng, KZN=Kwazulu-Natal, WC=Western Cape, EC= Eastern Cape, FS=Free State, MP=Mpumalanga, LP=Limpopo, NC=Northern Cape

Source: Road Traffic Management Corporation (RTMC)

Fatalities increased in Eastern Cape, Free state and Gauteng by 7%, 16% and 1%, respectively.

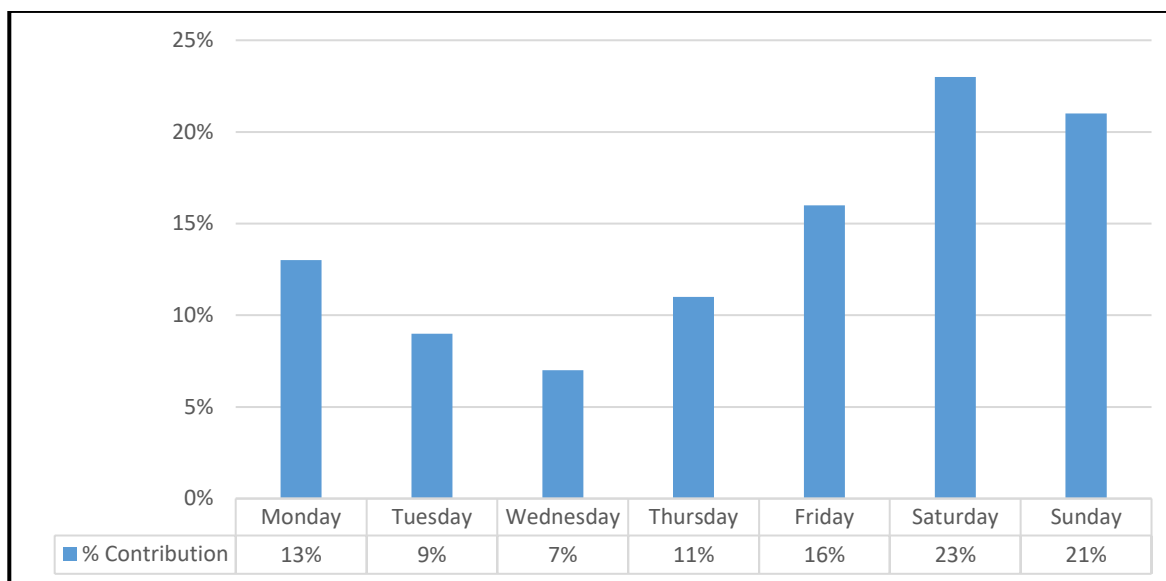

Table 2. 17: Percentage share of fatal crashes per day of the week, 2022/23 Festive

Day of the week	% Contribution
Monday	13
Tuesday	9
Wednesday	7
Thursday	11
Friday	16
Saturday	23
Sunday	21
Total accidents	100

Source: Road Traffic Management Corporation (RTMC)

Table 2.17 shows that fatal crashes tended to occur mostly on Saturday (23%) and Sunday (21%). It is further shown that less fatalities occurred on Wednesday (7%).

Figure 2. 16: Percentage share of crashes per day of the week, 2022/23 Festive

Source: Road Traffic Management Corporation (RTMC)

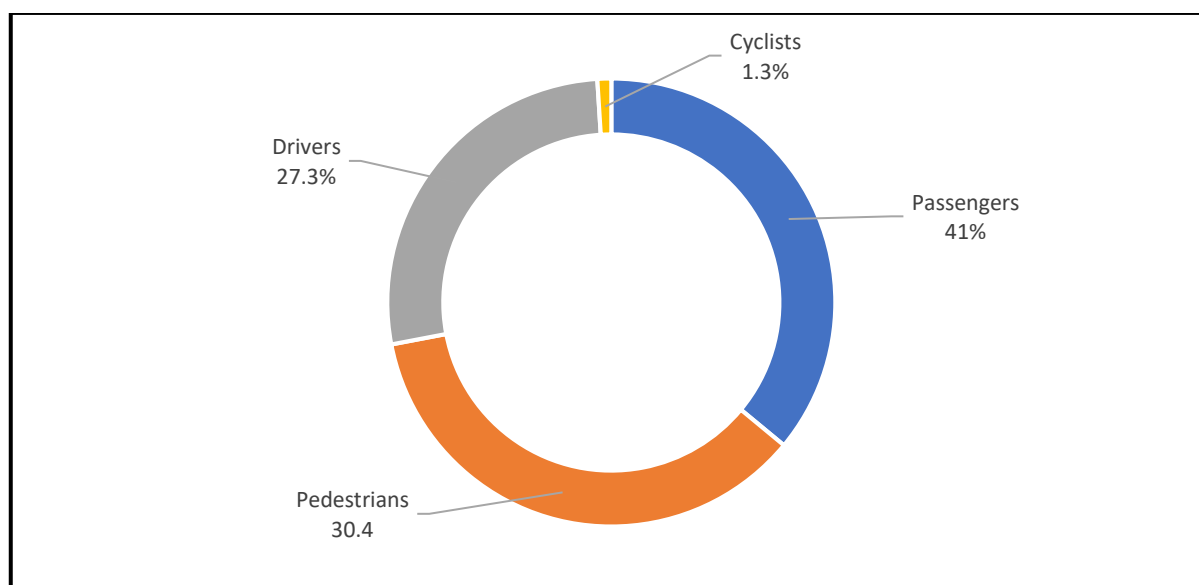

Table 2. 18: Percentage share of fatalities per road user group, 2022/2023 Festive

Road Users	% Contribution
Passengers	41.0
Pedestrians	30.4
Drivers	27.3
Cyclists	1.3
Total Fatalities	100

Source: Road Traffic Management Corporation (RTMC)

According to Table 2.18 above, passengers had the largest percentage share (41%) of road fatalities, followed by pedestrians (30.4%) and drivers (27.3%). Cyclists had the lowest percentage share of road fatalities (1.3%).

Figure 2. 17: Percentage share of fatalities per road user group, 2022/2023 Festive

Source: Road Traffic Management Corporation (RTMC)

Table 2. 19: Percentage share of fatalities per Gender & Race, 2022/2023 Festive

Gender	% Contribution
Males	74
Females	22
Unknown	4
Race	% Contribution
Black African	82
White	4
Asian	1
Coloured	6
Other	4
Foreigner	3
Total	100

Source: Road Traffic Management Corporation (RTMC)

Table 2.19 depicts the percentage share of fatalities per gender and race. Males had the largest contribution with regards to road fatalities with 74%, while females accounted for 22% of the total road fatalities. According to race categories, 82% of the fatalities recorded were Black Africans. Furthermore, of all the fatalities recorded for 2022/2023 festive, only 4% were whites and 6% were coloureds.

PART C: CALENDAR YEAR 2023

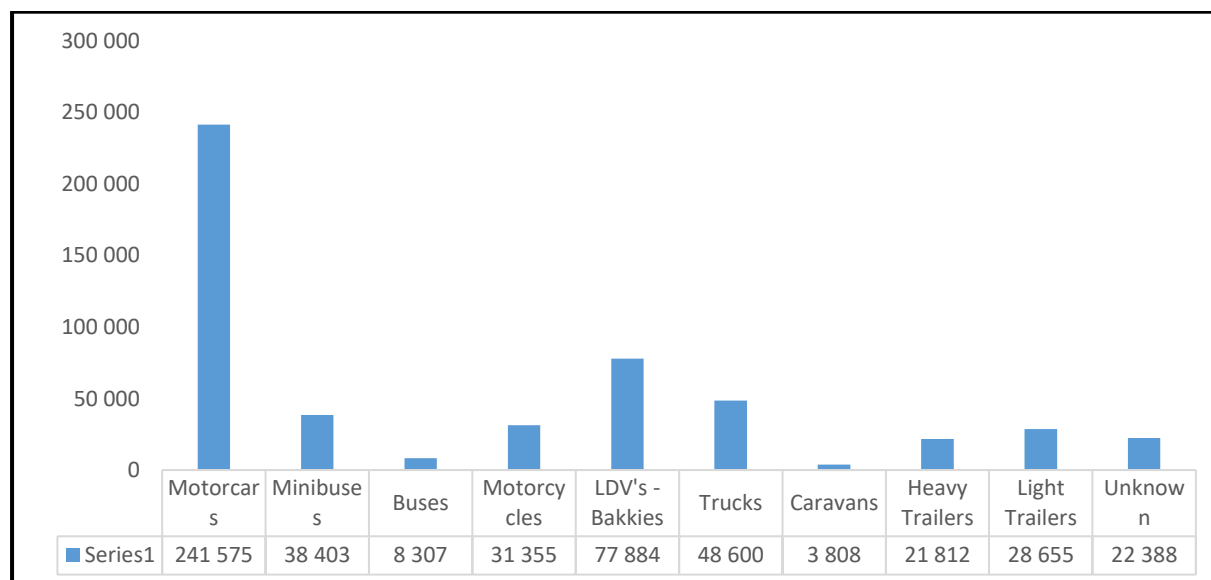

Table 2. 20: Number of un-roadworthy vehicles

Vehicle Type	Dec-21	Dec-22	Dec-23	% Change
Motorcars	284 640	318 240	241 575	-24.1
Minibuses	46 737	48 450	38 403	-20.7
Buses	10 509	10 663	8 307	-22.1
Motorcycles	35 891	40 603	31 355	-22.8
LDV's - Bakkies	87 970	104 199	77 884	-25.3
Trucks	57 020	58 823	48 600	-17.4
Caravans	3 816	4 498	3 808	-15.3
Heavy Trailers	23 745	36 405	21 812	-40.1
Light Trailers	29 149	39 693	28 655	-27.8
Unknown	22 608	34 613	22 388	-35.3
All Vehicles	602 085	796 187	523 627	-34.2

Source: Road Traffic Management Corporation (RTMC)

The total number of unroadworthy vehicles decreased by 34.2% in the calendar year 2023 to 523 627 vehicles from 796 187 vehicles in the previous year (Table 2.21 and Figure 2.19).

Figure 2. 18: Total number un-roadworthy vehicles, 2023

Source: Road Traffic Management Corporation (RTMC)

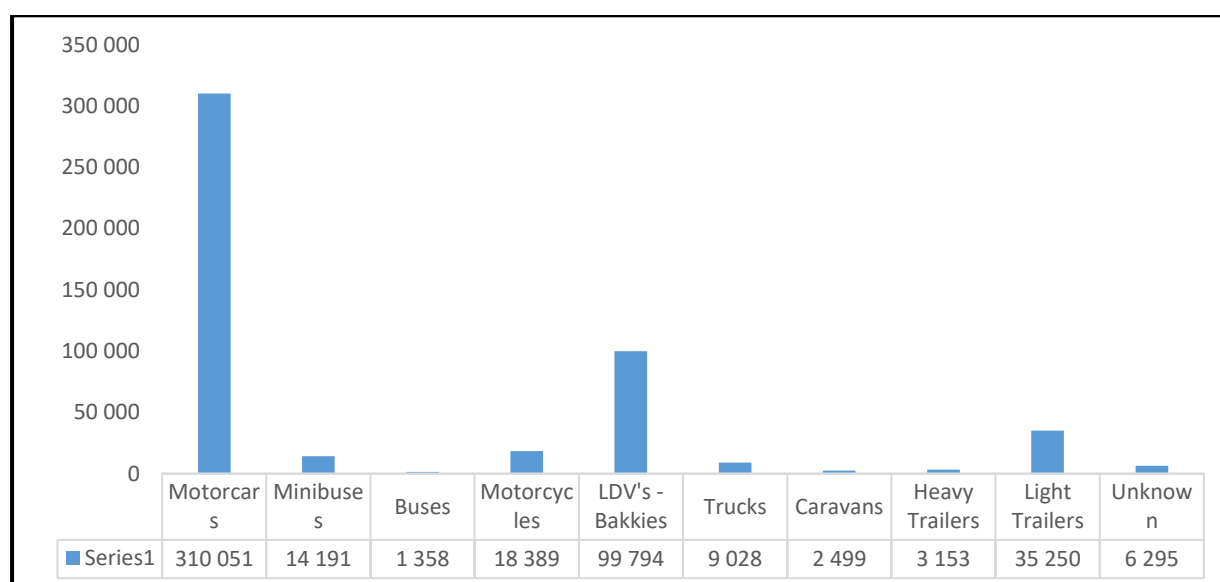

Table 2. 21: Number of unlicensed vehicles, 2021 – 2023

Vehicle Type	Dec 21	Dec 22	Dec 23	% Change
Motorcars	380 703	356 415	310 051	-13.0
Minibuses	20 163	14 549	14 191	-2.5
Buses	2 216	1 358	1 358	0.0
Motorcycles	22 510	20 556	18 389	-10.5
LDV's - Bakkies	122 801	112 851	99 794	-11.6
Trucks	12 425	9 508	9 028	-5.0
Caravans	3 528	3 328	2 499	-24.9
Heavy Trailers	4 348	3 504	3 153	-10.0
Light Trailers	45 453	44 652	35 250	-21.1
Unknown	10 505	7 799	6 295	-19.3
All Vehicles	624 652	575 820	500 895	-13.0

Source: Road Traffic Management Corporation (RTMC)

Table 2.21 summarises the number of unlicensed vehicles has decreased across all the vehicle types. In 2023, the overall number of unlicensed vehicles decreased by 13.0%. Caravans and light trailers were the major contributor to this decrease as both had over 20% decrease in the number of unlicensed vehicles.

Figure 2. 19: Number of unlicensed vehicles, 2023

Source: Road Traffic Management Corporation (RTMC)

Motorcars had the highest number of unlicensed vehicles, followed by LDV's Bakkies with 310 051 and 99 794 vehicles, respectively (Figure 2.19).

Table 2. 22: Number of fatal crashes & fatalities per province, 2022-2023

	Year	EC	FS	GP	KZN	LP	MP	NC	NW	WC	RSA
Fatal Crashes	2022	1 215	569	2 321	1 998	1 070	1 012	325	667	1 269	10 446

	2023	1 390	661	2 514	2 229	1 392	1 183	391	752	1 371	11 883
	% Change	-5.5%	-10.7%	-1.8%	-3.4%	1.2%	-8.5%	-6.2%	-9.6%	-4.7%	-4.4%

Note: GP=Gauteng, KZN=Kwazulu-Natal, WC=Western Cape, EC= Eastern Cape, FS=Free State, MP=Mpumalanga, LP=Limpopo, NC=Northern Cape

Source: Road Traffic Management Corporation (RTMC)

South African roads had 10 180 fatal crashes and 11 883 fatalities in the calendar year 2023 (Table 2.22). The percentage change between 2022 and 2023 in fatal crashes decreased by 2.5% to 10 180, whereas that of fatalities decreased by 4.4% to 11 883.

Figure 2. 20: Percentage change in fatal crashes & fatalities per province, 2023

Note: GP=Gauteng, KZN=Kwazulu-Natal, WC=Western Cape, EC= Eastern Cape, FS=Free State, MP=Mpumalanga, LP=Limpopo, NC=Northern Cape

Source: Road Traffic Management Corporation (RTMC)

Figure 2.20 shows the percentage changes in fatal crashes and road fatalities between the years 2022 and 2023.

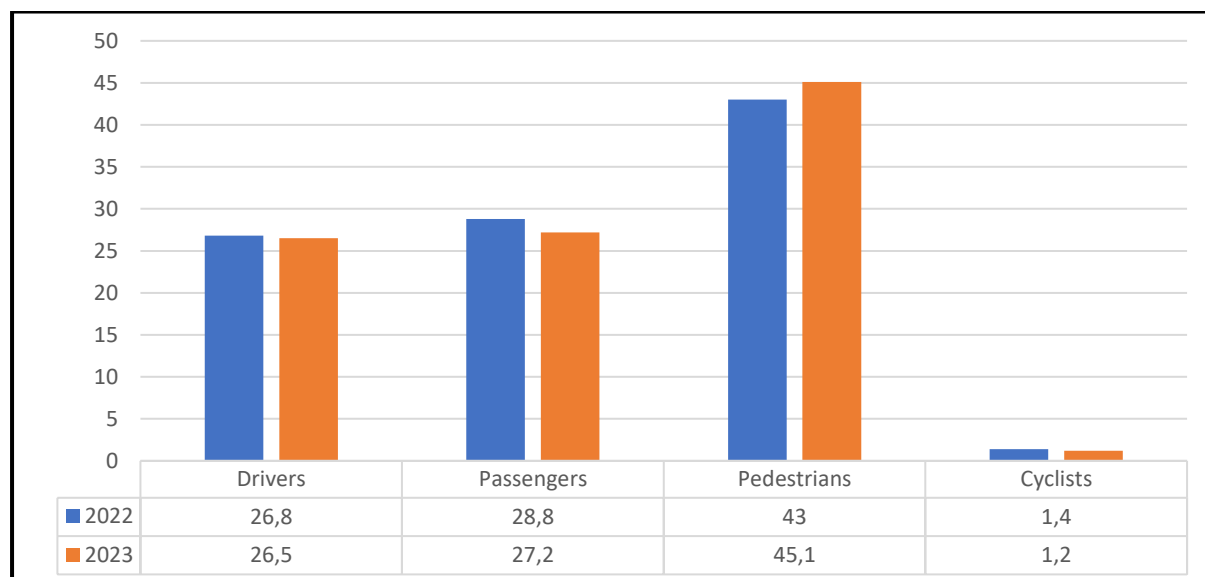

Table 2. 23: Distribution of fatalities per road user group (%), 2022 – 2023

User Group	2022	2023
Drivers	26.8	26.5
Passengers	28.8	27.2
Pedestrians	43	45.1
Cyclists	1.4	1.2

Source: Road Traffic Management Corporation (RTMC)

Table 2.23 summarises the distribution of fatalities per road user group. In 2023, pedestrians contributed (45.1%), followed by passengers with 27.2% and drivers with 26.5% to the total number of fatalities.

Figure 2. 21: Distribution of fatalities per road user group (%), 2022-2023

Source: Road Traffic Management Corporation (RTMC)

Figure 2.21 shows the percentage distribution of fatalities per road user group between 2022 and 2023. Cyclist (1.2%) were the lowest contributor to the total number of road fatalities in 2023.

Table 2. 24: Number of Major Crashes, 2022

Province	Major Crashes	Fatalities	Injuries
2021	82	533	452
2022	102	653	649

Source: Road Traffic Management Corporation (RTMC)

Table 2.24 shows that number of major crashes, fatalities and injuries increased in 2022. Major crashes increased by 24.4%. Fatalities and injuries increased by 22.5% and 43.6% respectively.

Table 2. 25: Major Crash Type nationally, 2023

Crash Types	% contribution
Accident with pedestrian	28.2
Hit and Run	23.6
Single vehicle (overturned)	18.1
Head on collision	9.3
Head/rear end	5.0
Accident with fixed/ other object	3.6
Sideswipe (opposite directions)	3.5
Single vehicle (left the road)	2.0
Person fell off	1.7

Source: Road Traffic Management Corporation (RTMC)

According to Table 2.25 above, the major crash types were from accidents with pedestrians (28.2%), hit and run (23.6%), single vehicle overturn (18.1%) and head on collisions at 9.3%.

Table 2. 26: Vehicle/Road/Human factors nationally, 2022

Vehicle Factor	% contribution
Tyres: burst prior to accident	41
Brakes: faulty	18
Tyres: smooth	8
Other	8
Headlights blinding	5
Overload: passenger	4
Headlights: faulty	3
Road & Environment Factors	% contribution
Visibility poor	12
Sharp bend	12
Other	12
Lighting: poor	10
Road surface: wet/slippy	8
Road surface: poor	7
Animal stray/wild	6
Visibility: smoke/fog/rain/etc	4
Road markings: poor/ inadequate/ none	2
Blind corner	2
Human Factors	% contribution
Jay-walking pedestrian	22.5
Other	18.4
Hit and run	21.3
Speed too high for circumstances	16.3
Overtook in face of oncoming traffic	6.8
Intoxicated driver with liquor/ drug usage	1.5
Turned in front of oncoming traffic	1.6
Disregard for stop signs	1.5
Trapped or fallen out	1.5
Followed vehicle too closely	2.6
Overtook across barrier line	1.9
Intoxicated pedestrian with liquor/ drug usage	0.7
Disregard for red lights	0.6

Source: Road Traffic Management Corporation

Table 2.26 above indicates that 41% of the vehicle factors that caused crashes are from tyres bursting prior to accident, 12% of the road and environment factors are due to poor visibility and 22.5% of the human causes are due to accidents with pedestrians.

2.5 CROSS BORDER

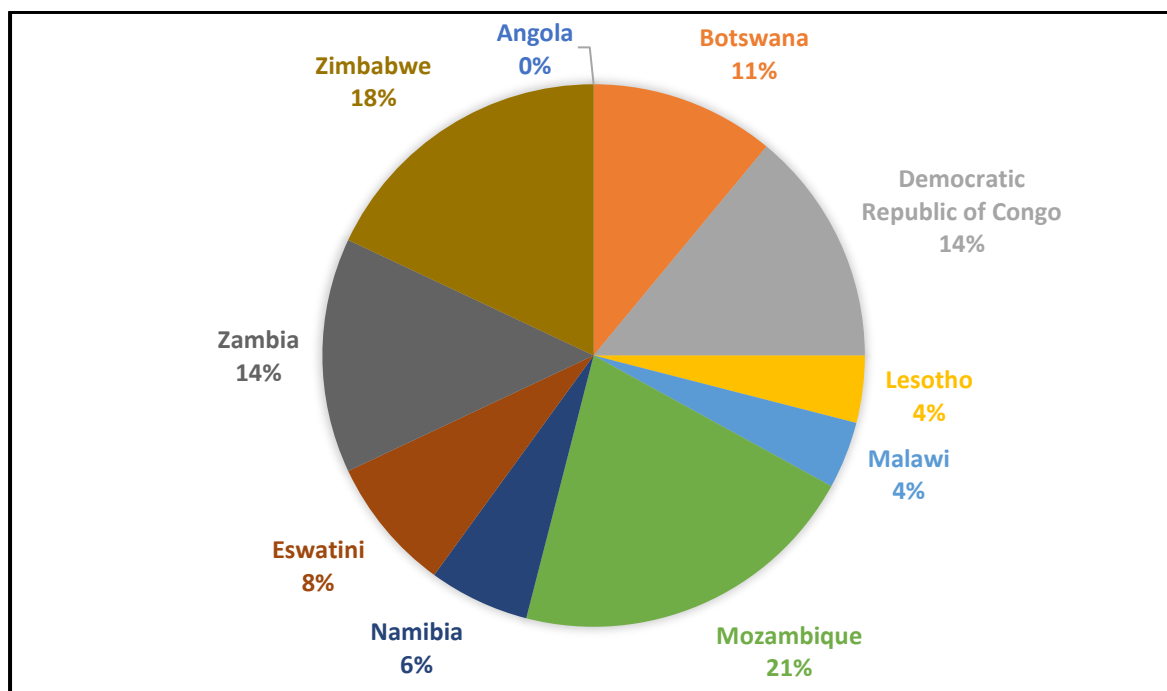

Table 2.27: Goods permit statistics

Country	2018/19	2019/20	2020/21	2021/22	2022/23
Angola	163	186	142	363	661
Botswana	7 886	8 263	6 380	6 446	6 715
Democratic Republic of Congo	8 080	6 505	5 163	4 850	8 273
Lesotho	2 960	3 371	2 640	2 803	2 548
Malawi	2 843	3 038	2 962	2 868	2 117
Mozambique	8 843	9 514	8 166	12 600	12 559
Namibia	4 931	4 920	3 815	4 070	3 713
Eswatini	4 978	5 018	4 113	4 507	4 522
Zambia	11 268	10 591	9 288	8 779	8 185
Zimbabwe	10 822	11 124	13 468	11 856	10 678
Cabotage	131	245	129	52	0
Total	62 995	62 930	56 637	59 194	59 971

Source: Cross Border Road Transport Management Agency

According to Table 2.27, the overall goods permit issued in the South Africa borders increased by 1.3% to 59 971 in 2022/23 from 59 194 in 2021/22.

Figure 2. 22: Good permit statistics, 2022/23

Source: Cross Border Road Transport Management Agency

Figure 2.22 shows that Mozambique had a largest share with 21%, followed by Zimbabwe (18%). Angola had the lowest share (0%).

Table 2. 28: Taxi passenger permit statistics

Country	2018/19	2019/20	2020/21	2021/22	2022/23
Botswana	612	853	16	153	284
Democratic Republic of Congo	2	4	1	3	1
Lesotho	1 105	1 098	146	509	634
Malawi	46	20	6	124	134
Mozambique	8 741	9 172	3 365	8 095	9 249
Namibia	164	102	6	94	102
Eswatini	706	771	22	126	574
Zambia	26	14	2	21	39
Zimbabwe	11 092	14 435	1 596	2 944	8 862
Total	22 494	26 469	5 160	12 069	19 883

Source: Cross Border Road Transport Management Agency

Table 2.28 depicts the number of taxi passenger permits issued from 2018/19 to 2022/23 financial year. In the 2022/23 financial year, taxi passenger permits increased by 64.7% to 19 883 from 12 069 in 2021/22.

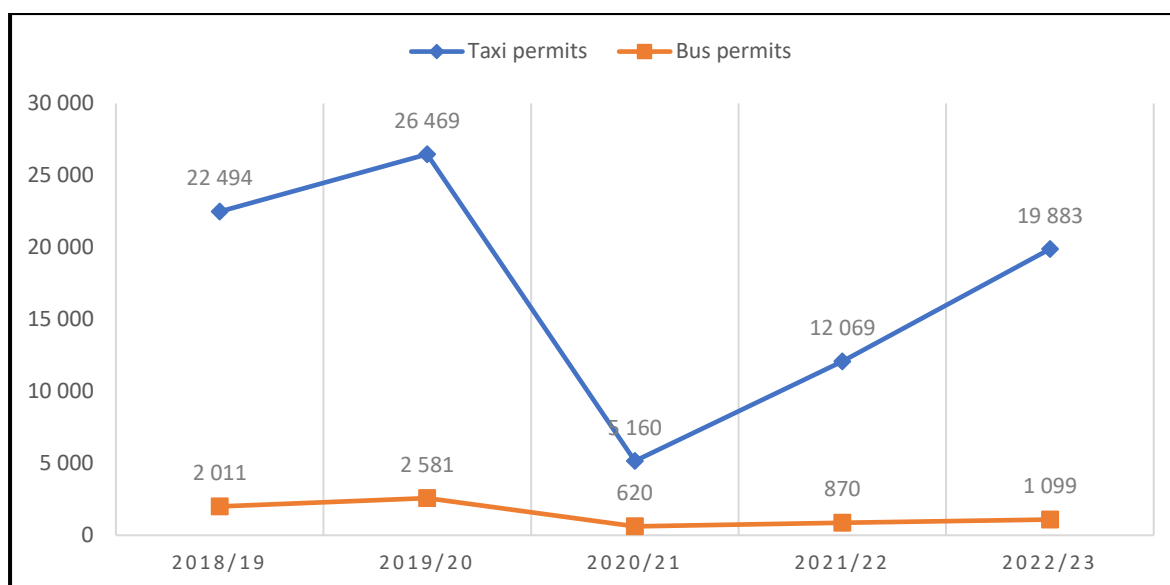

Table 2. 29: Bus passenger permit statistics

Country	2018/19	2019/20	2020/21	2021/22	2022/23
Botswana	98	164	7	11	36
Democratic Republic of Congo	08	6	0	2	2
Lesotho	125	149	2	36	20
Malawi	191	131	216	212	34
Mozambique	252	257	82	118	201
Namibia	35	41	21	8	85
Swaziland	58	50	7	2	16
Zambia	49	42	8	13	66
Zimbabwe	1 183	970	277	468	639
Total	1 999	1 810	620	870	1 099

Source: Cross Border Road Transport Management Agency

The bus passenger permits increased by 26.3% to 1 099 in 2022/23 from 870 in 2021/22, as illustrated by Table 2.29 above.

Figure 2. 23: Taxi and Bus passenger permit statistics

Source: Cross Border Road Transport Management Agency

Figure 2.23 shows that bus passenger permits have been decreasing from 2019/20 financial year to 2020/21. On the other hand, taxi permits decreased drastically in 2020/21 financial year and increased in 2022/23.

2.6 OVERLOAD CONTROL

Table 2. 30: Number of vehicles administrated at the weighbridges by province

Source: South African Roads Agency (SANRAL)

Table 2.30 shows the overall number of trucks that are weighted on the South African weighbridges. In 2023, BBTCC received the highest volumes with 188 274 trucks

being weighted, followed by Zebediela and Mantsole SB with 144 839 and 111 320, respectively.

Figure 2. 24: Number of vehicles administrated at the weighbridges

Source: South African Roads Agency (SANRAL)

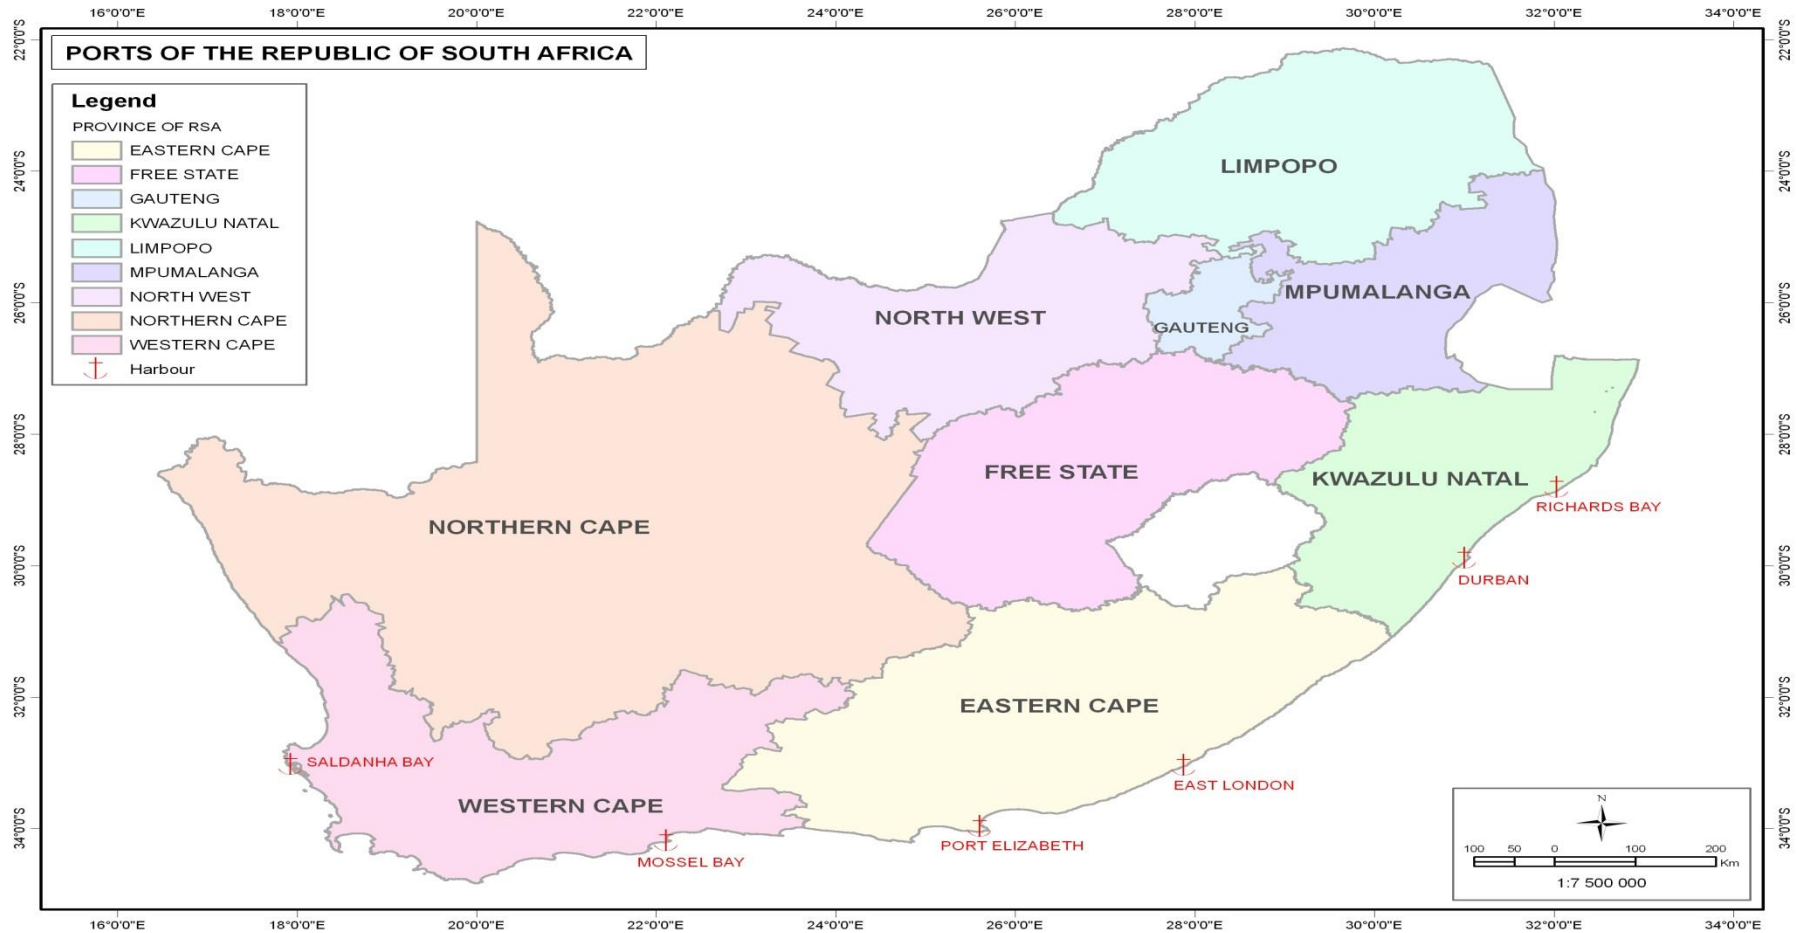

Figure 2.24 provides an overview picture with regards to the number vehicles which were received at the South African weighbridges. Total vehicles visited the weighbridges in 2022 were more than 1.9 million and the number decreased in 2023 to just above 1.8 million vehicles. In 2020 at the peak of covid-19 pandemic, the number of trucks on the road were significantly reduced on the roads and weighbridges managed to administer about 949 340 vehicles.

Source: The World bank

Table 3.11 shows the world top 10 container port traffic between 2016 and 2021. During the same period is evident that United States, China and the Arab world have significantly more traffic when compared the rest of the world. In 2021, China had the highest container port traffic with 262 million TEUs, the followed by United States and the Arab world with 60 million TEUs and 54 million TEUs respectively.

Figure 3. 8: World top 10 container port traffic (TEU: 20 foot equivalent units) percentage share, 2021

Source: The World bank

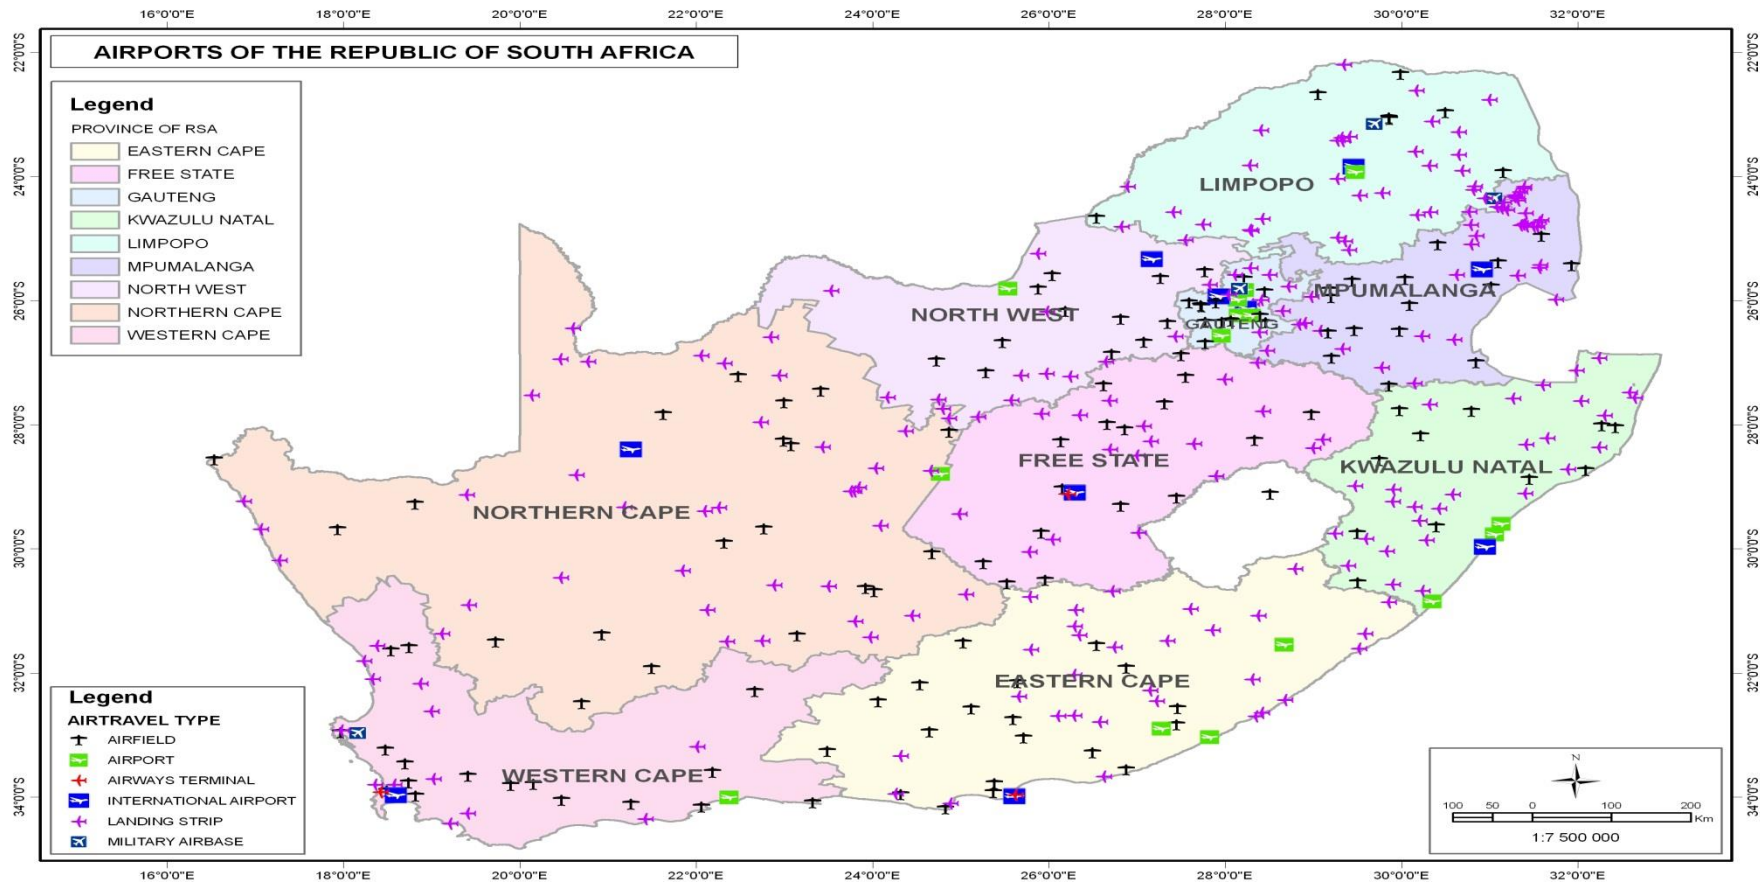

Figure 3.8 above depicts that in 2021, China had the highest percentage share of container port traffic, followed by United States and Arab World.

SECTION 4

SECTION 4: AVIATION

MAP C1: Airports of the Republic of South Africa

4.1 AIRCRAFT REGISTRATION AND LICENSING

Table 4. 1 : Number of Students, Aeroplane and Helicopter Licenses Issued by Race, 2022/23

Student	African	Coloured	Indian	White
	659	116	111	1 504
Aeroplane	African	Coloured	Indian	White
	733	171	250	7 638
Helicopter	African	Coloured	Indian	White
	73	12	23	1 639

Source: South African Civil Aviation Authority (SACAA)

In terms of the demographics picture in 2022/23 financial year, most students whom enrolled in Aviation courses are in the White (1 504) population group, followed by Africans (639) and Indians (111). In addition, whites have the highest number of Licenses Issues for both Aeroplanes (7 638) and Helicopters (1 639) when compared to the other population groups.

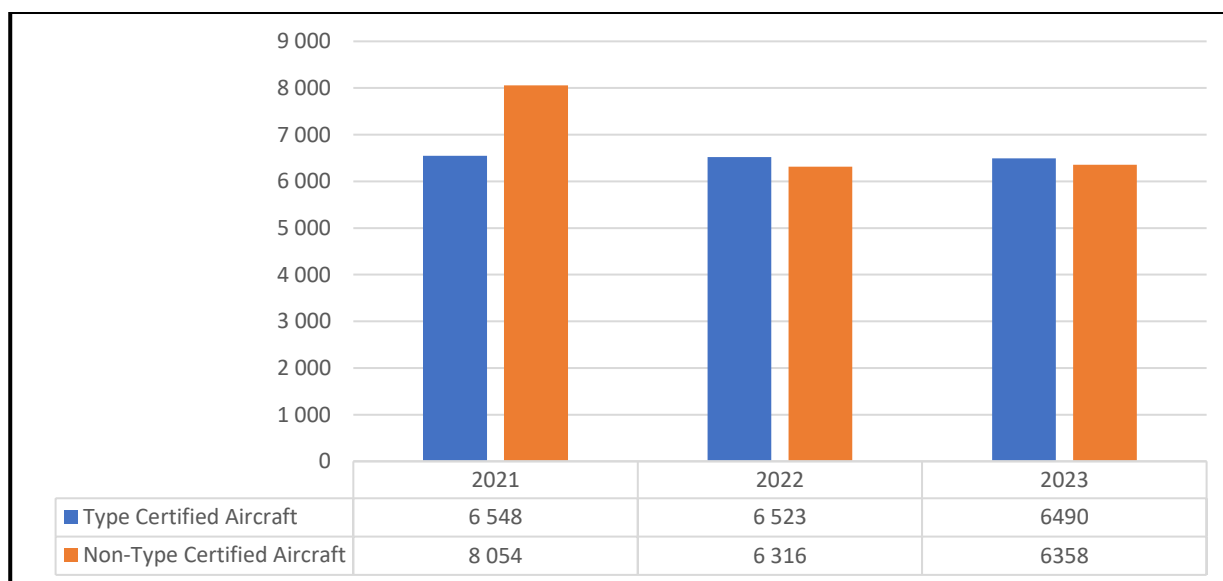

Table 4. 2: Number of Type Certified Aircraft versus Non-Type Certified Aircraft: Three-year comparison, 2021 – 2023

Aircraft type	2021	2022	2023	% change between 2022 and 2023
Type Certified Aircraft	6 548	6 523	6490	-0.51
Non-Type Certified Aircraft	8 054	6 316	6358	0.66
Total	14 602	12 839	12 848	0.07

Source: South African Civil Aviation Authority (SACAA)

In the year 2023, the number of Type Certified Aircraft decreased by 0.51% to 6 490 from 6 523 in 2022, while the Non-Type Certified Aircraft increased by 0.66% as illustrated by Table 4.2.

Figure 4. 1: Annual Number of Type Certified Aircraft versus Non-Type Certified Aircraft, 2021 – 2023

Source: South African Civil Aviation Authority (SACAA)

Figure 4.1 depicts that the annual number of Type Certified Aircraft surpassed that of Non-Type Certified in 2023.

4.2 AIR TRAFFIC INFORMATION

Table 4. 3: Passenger Volumes by Airport, 2021/18 – 2022/23

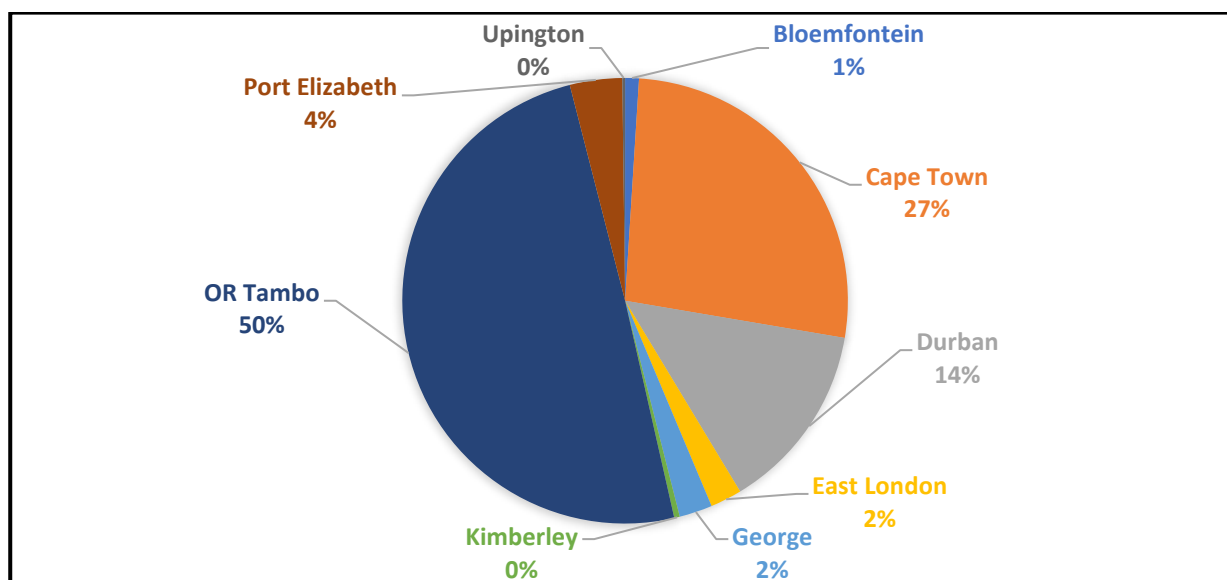

Airport	2017/18	2018/19	2019/20	2020/21	2021/2022	2022/23

Actual 2022/23	4	1	0	3	0	1	1	0	0	1	3	2	16

Source: South Africa Civil Aviation Authority (SACAA)

The total number of aircraft accidents decreased by 25 in the 2022/23 financial year to 140, while serious incidents also decreased by 36 to 16 in the same financial year.

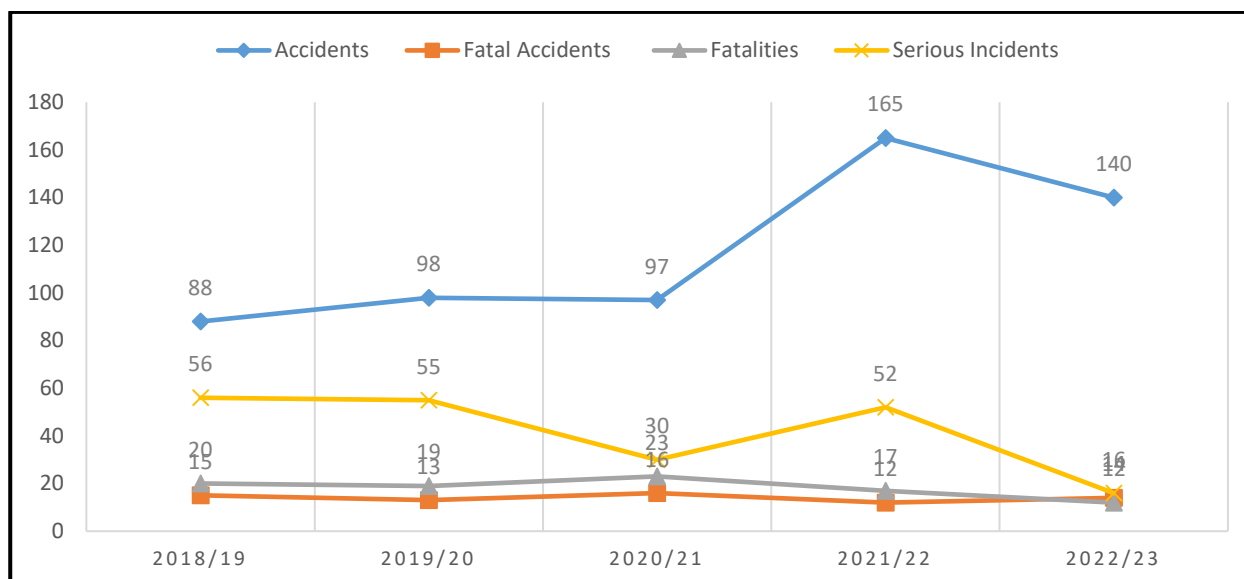

Table 4. 6: Aircraft Accidents and Incidents, 2018/19 – 2022/23

Type	2018/19	2019/20	2020/21	2021/22	2022/23
Accidents	88	98	97	165	140
Fatal Accidents	15	13	16	12	14
Fatalities	20	19	23	17	12
Serious Incidents	56	55	30	52	16

Source: South Africa Civil Aviation Authority (SACAA)

There was a 15% decline in aircraft accidents to 140 in 2022/23, however, fatal accidents increased from 12 in 2021/22 to 14 in the financial year 2022/23. Serious accidents and fatalities also declined by 69% and 29%, respectively.

Figure 4. 4: Annual Number of Aircraft Fatal Accidents and Fatalities, 2018/19 – 2022/23

Source: Airports Company of South Africa (ACSA)

Figure 4.4 depicts aircraft accidents, serious accidents, fatal accidents and fatalities between the period 2018/19 - 2022/23. Accidents, serious accidents and fatalities declined in 2022/23, while fatal accidents increased.

Table 4. 7: Licence Types of Pilots Involved in Accidents, 2020/21 – 2022/23

Licence Type	2020/21	2021/22	2022/23
Airline Transport Pilot Licence	5	16	8
Commercial Pilot Licence	31	33	23
Glider Pilot Licence	2	1	1
National Pilot Licence	14	30	14
Private Pilot Licence	34	47	46
Remote Pilot Licence	1	17	28
Student Pilot Licence	10	20	20

Source: Airports Company of South Africa (ACSA)

Table 4.7 depicts the licence types of Pilots involved accidents. In 2022/23 financial year, Pilots involved in accidents decreased across all Licence Types except for Remote Pilots who had a 64.7% increase in accidents involved in, Gilder and student who had no change in the number of accidents involved.

Figure 4. 5: Annual Number of Accidents by Pilot License Type, 2020/21 – 2022/23

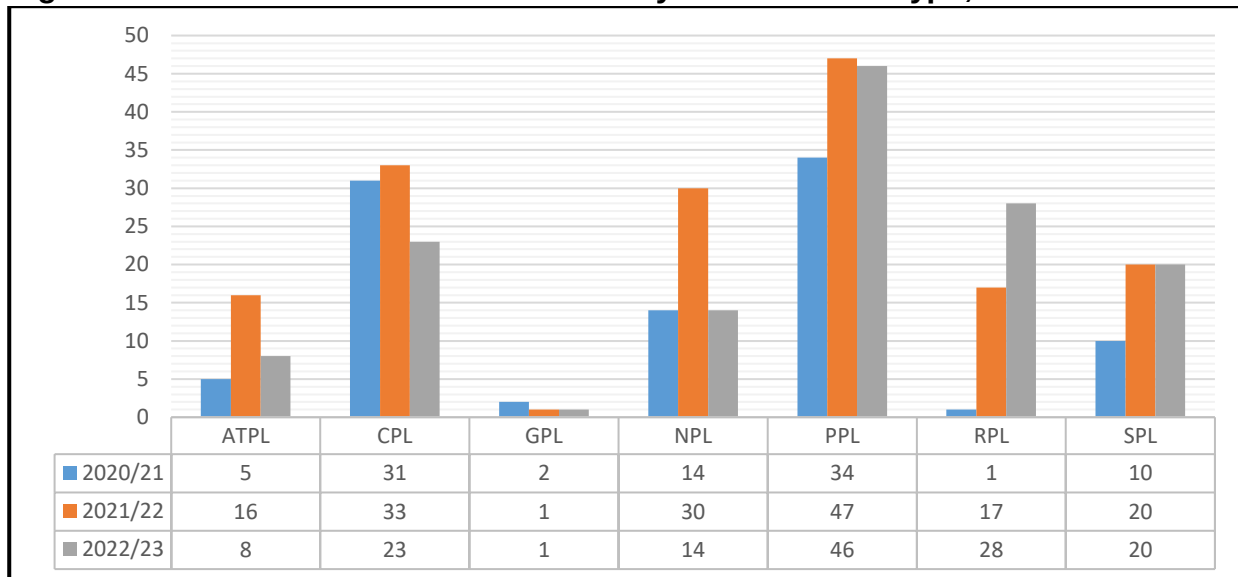

Figure 4.5 shows that the majority of accidents between 2021/22 and 2022/23 involved Private Pilot License holders, followed by Commercial Pilot holders.

Figure 4. 6: Remotely Piloted Aircraft Systems (Drone)

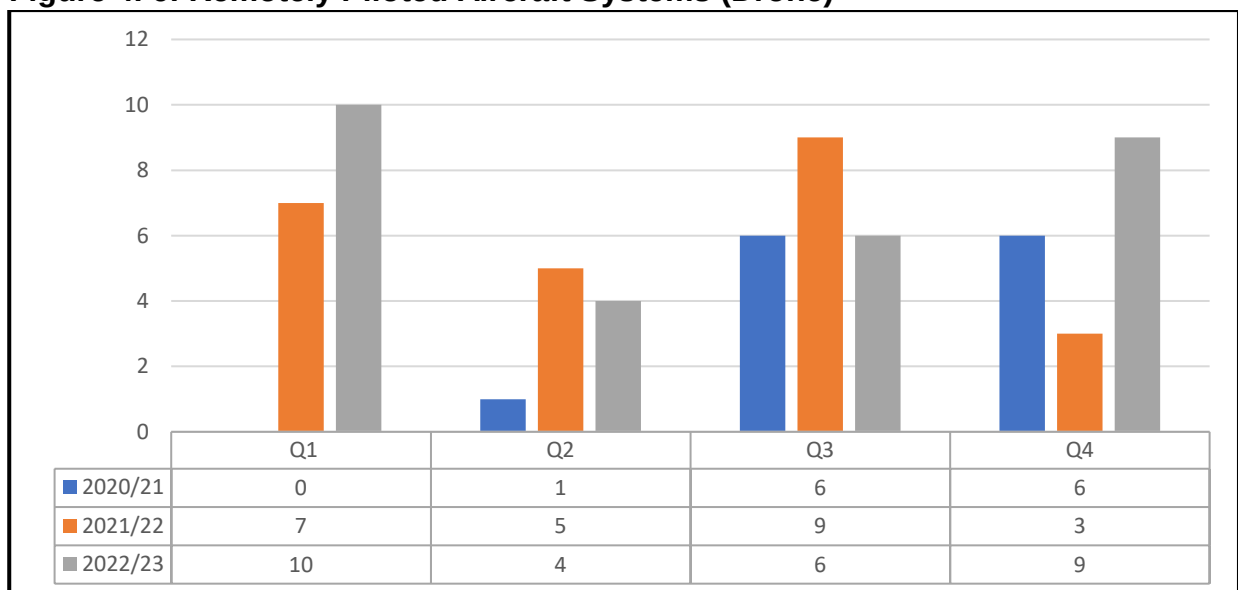

Figure 4.6 illustrates that the number of unauthorised drone activities increased by 21% to 29 in the 2022/23 financial from 24 in the 2021/22 financial year.

Table 4.8 above depicts the top African air transport passenger volumes from 2018 to 2022. It is shown that over the years South Africa had the largest aircraft passenger volumes in Africa, however, in 2022 Egypt, Arab Rep (37.9 million) had highest passenger volumes, followed by South Africa and Morocco with 30 million and 20.5 million, respectively.

Figure 4. 7: Percentage share of African top 10 air transport passenger volumes, 2022

Source: The World Bank

Egypt, Arab Rep had the highest percentage share in 2022 when compared to the other top 10 African countries with 34% share, followed by South Africa and Morocco with 27% and 18%, respectively (Figure 4.7).

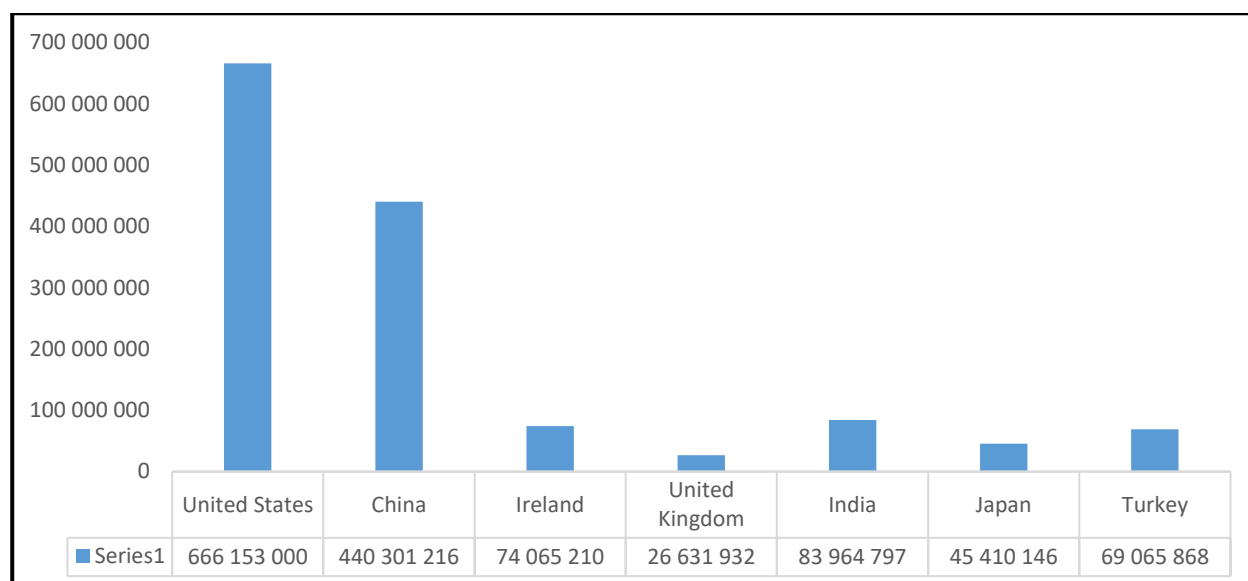

Table 4. 9: World top 10 air transport passenger volumes in thousand

Table 4.9 depicts the global top 10 air passenger volumes by country with the available data. The also shows the impact of Corona virus in the world, which led to the significant decline in terms of the aircraft passenger volumes.

Figure 4. 8 Percentage share of World top 10 air transport passenger volumes, 2021

Source: The World Bank

In 2021 United States (666.1 million) recorded the highest passenger volumes, followed by China and India with 440.3 million and 84 million respectively.

SECTION 5

SECTION 5: RAIL

5.1 RAIL PASSENGER INFORMATION

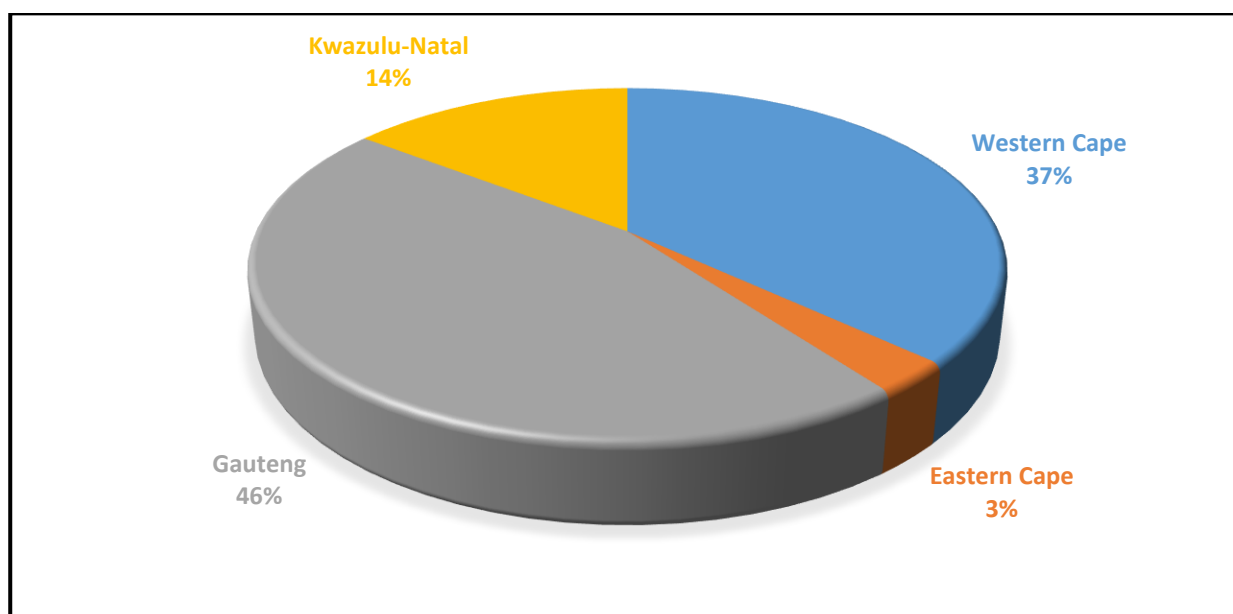

Table 5. 1: Metrorail Rail Passengers by Region in thousand

	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western Cape	75 074	46 986	34 647	1 029	2 067	5 949
Eastern Cape	6 771	6 481	5 253	512	759	512
Gauteng	117 603	99 972	54 040	2 329	3 747	7 344
Kwazulu-Natal	63 443	55 060	31 300	6 135	10 116	2 280
Metrorail Total	262 893	208 501	125 241	10 005	16 699	15 625
% change	-29.3%	-20.7%	-39.9%	-92.0%	66.9%	-6.4%

Source: Passenger Rail Agency of South Africa (PRASA)

The Metrorail passenger volumes decreased by 6.4% to 15.6 million in the 2022/23 financial year from 16.69 million in 2021/22, as shown by Table 5.1 above.

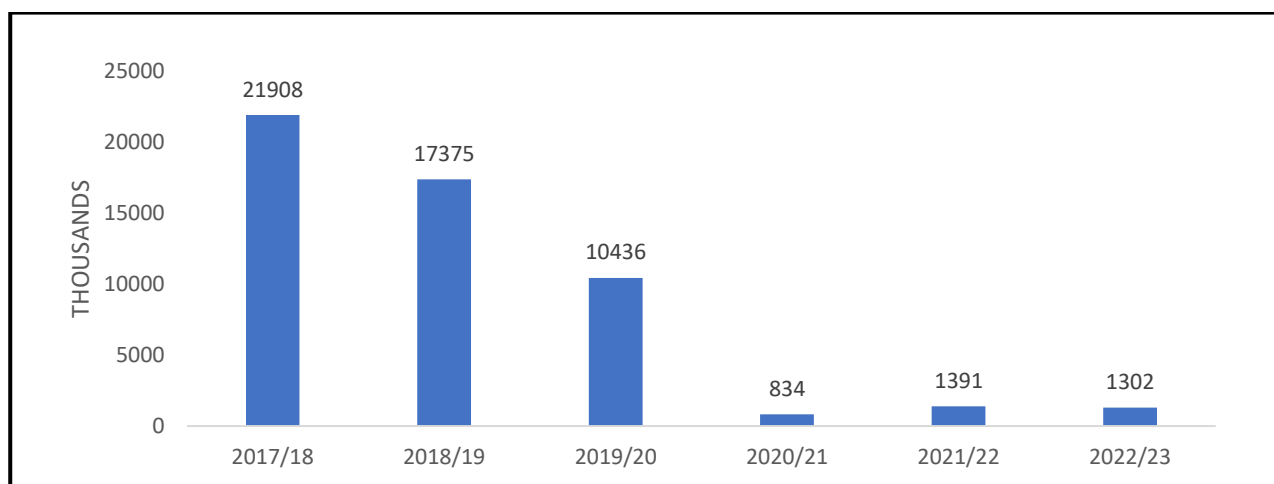

Figure 5. 1: Percentage share in Metrorail Passenger Volumes, 2022/23

Source: Passenger Rail Agency of South Africa (PRASA)

Figure 5.1 shows that Gauteng region recorded the highest rail passenger volumes with a percentage share of 46%, followed by Western Cape and Kwazulu-Natal with 37% and 14%, respectively. Eastern Cape had the lowest rail passenger volumes with 3%.

Figure 5. 2: Monthly average Metrorail Passenger Volumes

Source: Passenger Rail Agency of South Africa (PRASA)

Figure 5.2 above shows that there was a decline of 6.4% in monthly average Metrorail passenger volumes to about 1.3 million 2022/23 financial year.

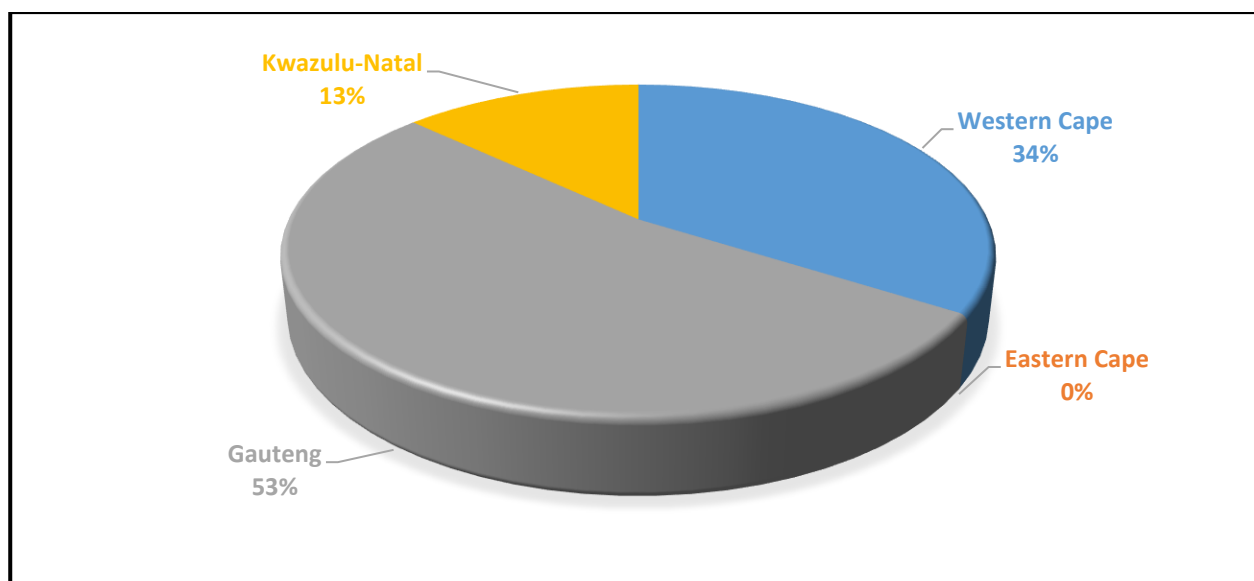

Table 5. 2: Passenger Kilometres Travelled by Region in thousand

	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western Cape	1 811 303	1 122 832	813 118	16 266	36 959	106 614
Eastern Cape	169 326	158 066	127 511	11 408	16 573	845
Gauteng	3 449 461	2 834 382	1 465 099	47 862	76 458	168 241
Kwazulu-Natal	1 550 233	1 329 935	750 904	125 020	210 983	39 943
Metrorail Total	6 980 323	5 445 216	3 156 633	200 556	340 973	315 643
% change	-29.3%	-21.9%	-42.0%	-93.7%	70.0%	-7.4%

Source: Passenger Rail Agency of South Africa (PRASA)

In the 2022/23 financial year, Metrorail passenger kilometres travelled dropped by 7.4% to 315.6 million from 340.9 million in 2021/22 financial year (Table 5.2).

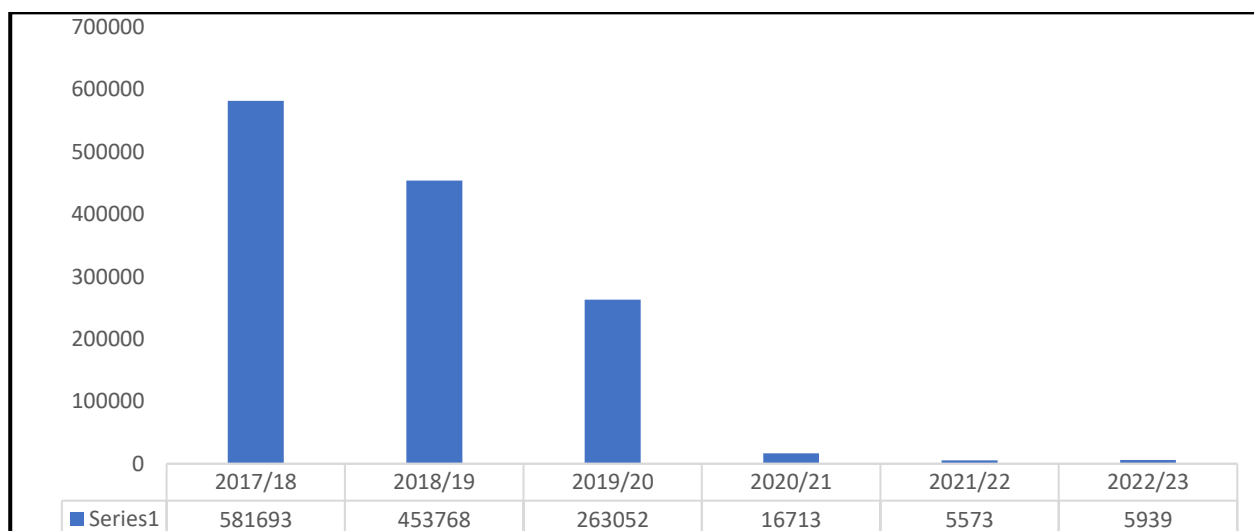

Figure 5.3: Percentage share in Passenger Kilometres Travelled, 2022/23

Source: Passenger Rail Agency of South Africa (PRASA)

Gauteng region recorded the highest passenger kilometres travelled share of 53%, followed by Western Cape with 34%, as depicted in Figure 5.3.

Figure 5. 4: Monthly Average for Passenger Kilometres Travelled

Source: Passenger Rail Agency of South Africa (PRASA)

Throughout the years we observe a decreasing trend with regards to passenger kilometres travelled, with the highest monthly average volumes recorded in the year 2017/18 (58.1 million) while the lowest was recorded in 2022/23 with 5.9 million kilometres.

5.2 RAIL PERFORMANCE

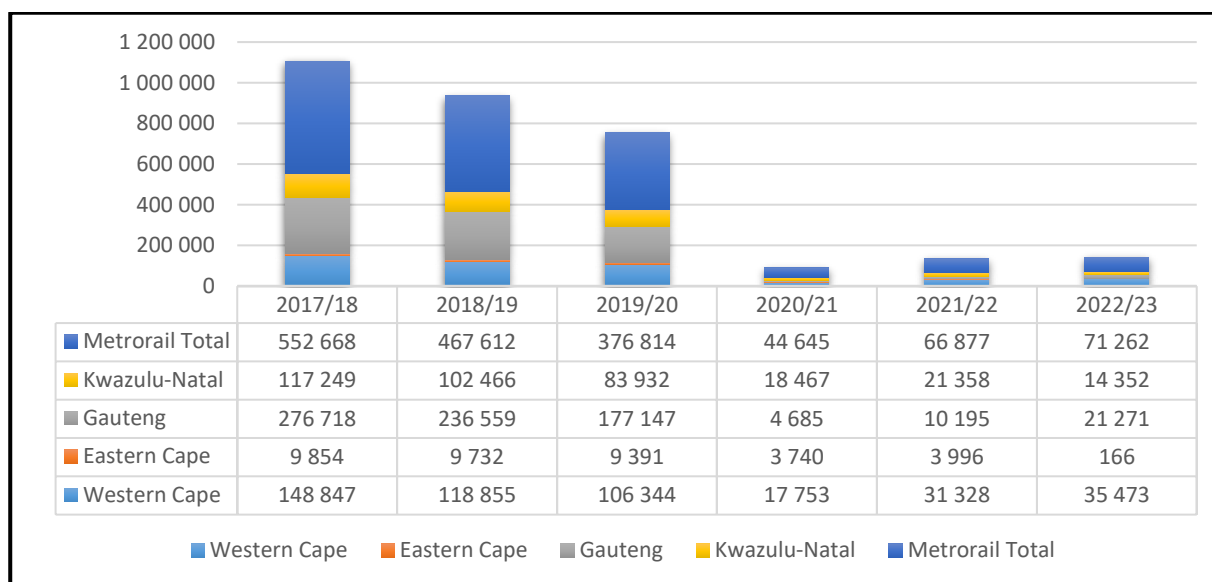

Table 5. 3: Number of Trains ran

Region	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western Cape	148 847	118 855	106 344	17 753	31 328	35 473
Eastern Cape	9 854	9 732	9 391	3 740	3 996	166
Gauteng	276 718	236 559	177 147	4 685	10 195	21 271
Kwazulu-Natal	117 249	102 466	83 932	18 467	21 358	14 352
Metrorail Total	552 668	467 612	376 814	44 645	66 877	71 262
Percentage change	-6.7%	-15.4%	-19.4%	-88.2%	49.8%	6.6%

Source: Passenger Rail Agency of South Africa (PRASA)

The total number of trains ran grew by 6.6% to 71 262 in 2022/23 financial year from 66 877 units in 2021/22. In 2022/23, Western Cape (35 473) recorded the highest number of trains ran while Eastern Cape (166) recorded the lowest number of trains ran (Table 5.3).

Figure 5. 5: Number of Trains ran (thousand), 2017/18 – 2022/23

Source: Passenger Rail Agency of South Africa (PRASA)

Figure 5.5 shows that Western Cape recorded the highest number of trains ran in the last three consecutive financial years while Eastern Cape recorded the lowest in the similar periods.

Table 5. 4: Average Percentage of Trains on Time, 2017/18 – 2022/23

Region	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western cape	54.7%	50.5%	42.8%	48.0%	64.07%	35.93%
Eastern cape	73.2%	62.5%	71.4%	35.3%	58.93%	82.23%
Gauteng	85.2%	72.7%	45.6%	88.8%	85.79%	86.38%
Kwazulu-Natal	71.4%	69.5%	69.8%	76.3%	72.50%	88.27%
Metrorail Total	73.8%	66.12%	62.3%	62.9%	69.77%	77.26%

Table 5. 5: Average Percentage of Train Delayed as a % of Train Run, 2017/18 – 2022/23

Region	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western cape	45.3%	50.5%	57.2%	52.0%	36%	33%
Eastern cape	26.8%	37.5%	54.4%	64.7%	41%	18%
Gauteng	14.8%	27.3%	28.6%	11.2%	14%	14%
Kwazulu-Natal	28.6%	30.5%	30.2%	23.7%	28%	12%
Metrorail Total	26.2%	33.9%	37.7%	37.1%	30%	76%

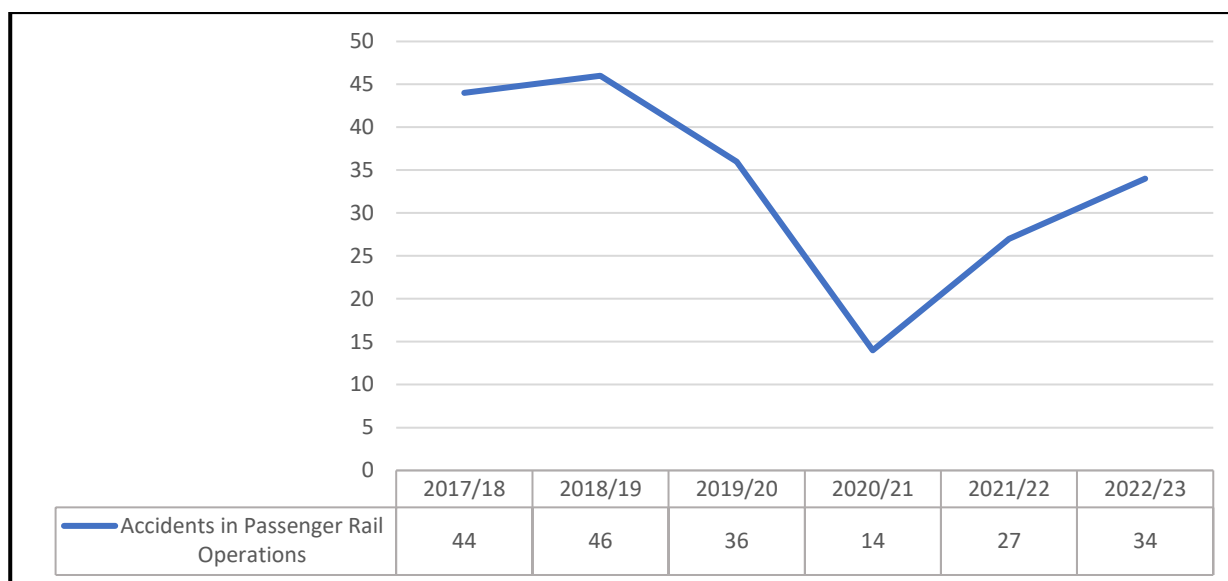

Table 5. 6: Average Percentage of Trains Cancelled as a % of Train Run, 2017/18 – 2022/23

Region	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Western cape	24.1%	17.8%	19.3%	12.6%	19%	14%
Eastern cape	1.6%	3.1%	5.5%	4.1%	9%	1%
Gauteng	8.9%	15.6%	17.6%	6.2%	3%	4%
Kwazulu-Natal	9.1%	20.2%	30.9%	10.6%	22%	13%
Metrorail Total	13.5%	16.9%	21.2%	10.5%	17.52%	11%

Source: Passenger Rail Agency of South Africa (PRASA)

In 2022/23 financial year, about 77.26% of trains were on time at national level (Table 5.4), 76% of trains were delayed (Table 5.5) and 11% were cancelled (Table 5.6) in the Metrorail trains.

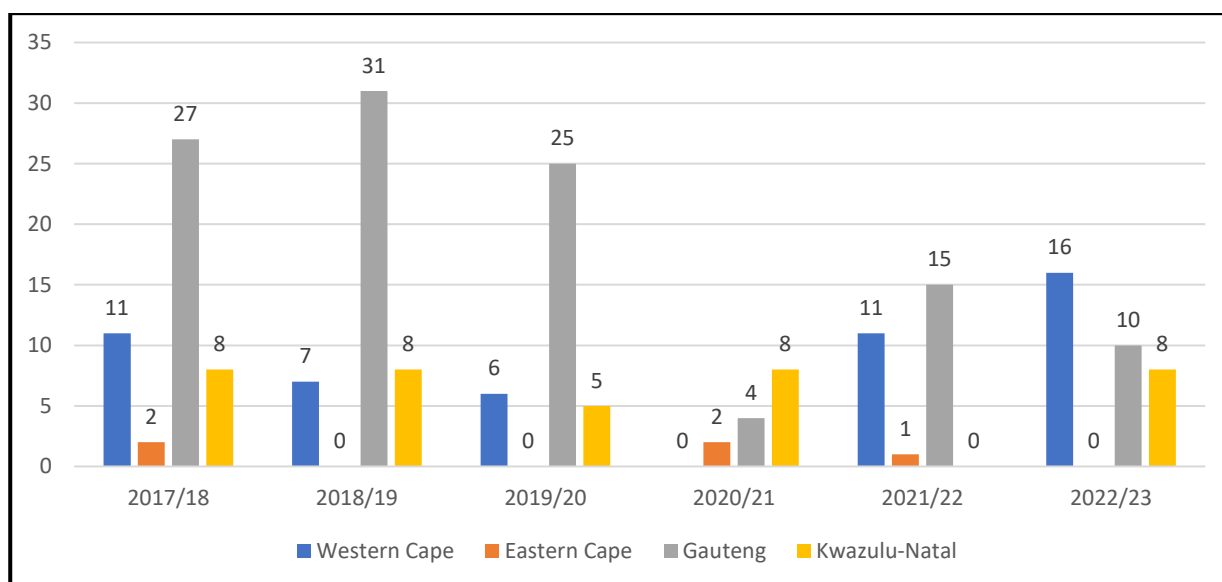

Figure 5. 6: Accidents in Passenger Rail Operations, 2017/18 – 2022/23

Source: Passenger Rail Agency of South Africa (PRASA)

Figure 5.6 shows accidents in passenger rail operations from 2017/18 to 2022/23. The number of accidents in passenger rail operations recorded in 2023/23 financial year were 34, which was higher than the previous financial year.

Figure 5. 7: Accidents in Passenger Operations by Region, 2017/18 – 2022/23

Source: Passenger Rail Agency of South Africa (PRASA)

Figure 5.7 shows that Western Cape (16) had the highest number of accidents in passenger operations in 2022/23, followed by Gauteng (10). On the contrary, East London recorded that it had zero accidents in passenger operations in 2022/23.

5.3 GAUTRAIN STATISTICS

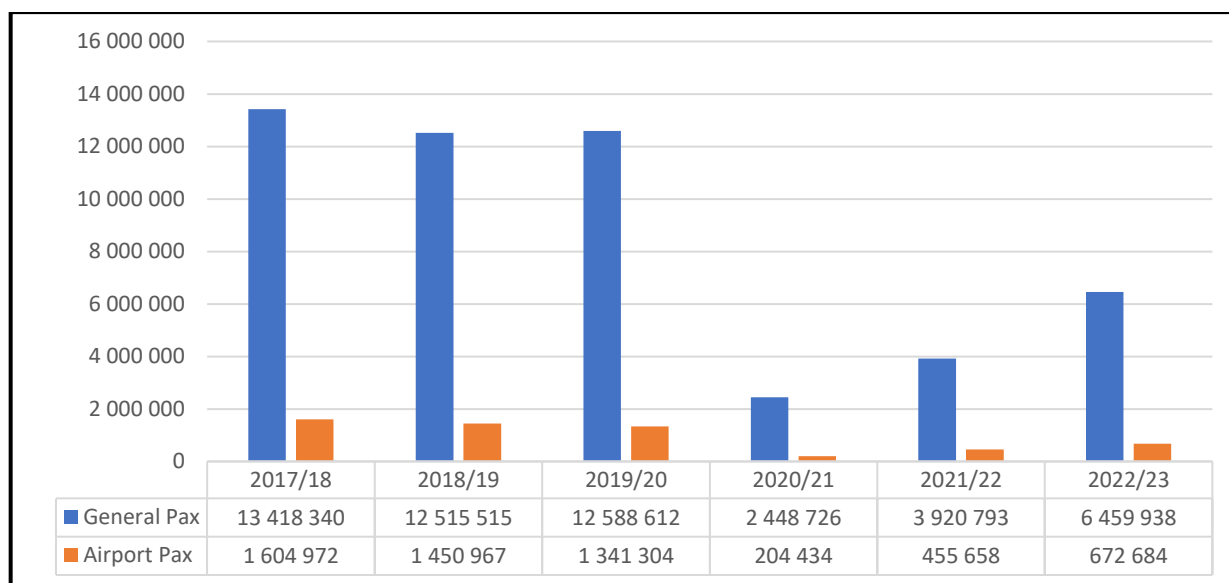

Table 5. 7: Annual Gautrain Passenger Flows, 2017/18 – 2022/23

Financial Year	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Train Total	15 023 312	13 966 482	13 929 916	2 653 160	4 336 451	7 132 622
General Pax	13 418 340	12 515 515	12 588 612	2 448 726	3 920 793	6 459 938
Airport Pax	1 604 972	1 450 967	1 341 304	204 434	455 658	672 684
Percentage Change	-3.8%	-7.0%	-0.3%	-81.0%	63.4%	64.5%

Source: Gautrain Management Agency

In 2022/23 financial year, there was 64.5% increase in passenger volumes transported by the Gautrain from 4.3 million in 2021/22 to 7.1 million (Table 5.7).

Figure 5. 8: Annual Gautrain Passenger Flows, 2017/18 – 2022/23

Source: Gautrain Management Agency

Figure 5.8 shows that over the years, passenger volumes for general trips exceeded that of airport trips.

SECTION 6

SECTION 6: PIPELINES

6.1 PIPELINES

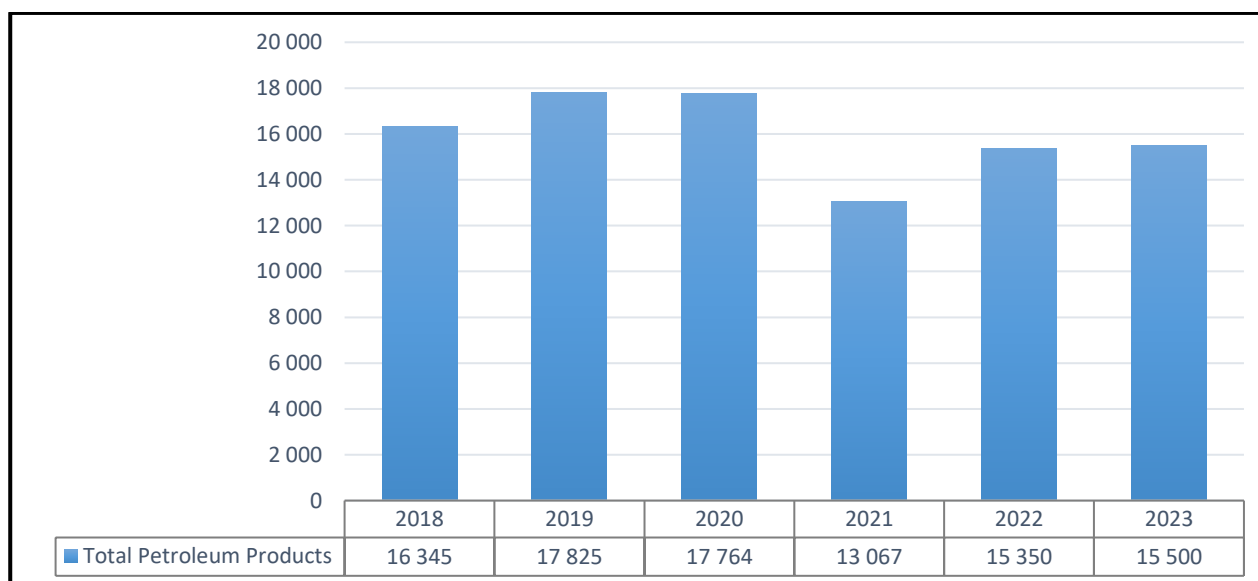

Table 6. 1: Annual Volumes of Petroleum Products Transported, 2018 – 2023

Volumes	Unit of measure	2018	2019	2020	2021	2022	2023
Total Petroleum Products	ml	16 345	17 825	17 764	13 067	15 350	15 500
Percentage change	%	-3.7%	9.06%	-0.34%	-26.44%	17.47%	0.98%
Refined	ml	10 678	11 186	11 196	9 003	9 792	9 677
Crude	ml	4 534	5 462	5 440	3 679	4 864	4 863
Avtur	ml	1 133	1 177	1 128	385	694	960
Gas	million m3	489	509	511	493	527	516
Storage	ml	315	553	634	321	185	97

Source: Transnet Pipelines

Table 6.1 and Figure 6.1 show that in 2023, the total annual volume of petroleum products expanded slightly by 0.98% to 15.50 billion litres from 15.35 billion litres in 2022.

Figure 6. 1: Annual Volumes of Petroleum Products Transported (ml), 2018 – 2023

Source: Transnet Pipelines

The volumes of petroleum products decreased for the period of six years from 16.3 billion litres in 2018 to 15.5 billion litres in 2023 (Figure 6.1).

NOTES
