An aerial photograph of a large industrial facility, likely a refinery or petrochemical plant. The facility features several large white storage tanks labeled 'TK-01' through 'TK-05'. In the foreground, there is a modern building with a solar panel roof and a parking lot with several trucks. The facility is surrounded by green fields and a road with yellow lane markings.

Analysis of Inland Liquid Fuels Market and competitive developments

Africa International Advisors (AIA) is pleased to submit this preliminary proposal. We believe that we are well equipped to assist Vopak to update the fuel and transport fuels market update.

In addition, AIA will provide the following overviews of additional markets outside South Africa:

- Deep dive into the market for liquids imports/exports and storage in Namibia
- High level overview of the African market and potential investment opportunities for Vopak

Yours sincerely,

AGENDA

- 1. AIA Company Profile**
2. Background and Context
3. Approach and Methodology
4. Costing
5. Team

Since 2002 we have been transforming strategy into value, across sectors and borders

Delivering insight, advisory, and investment solutions across Africa and beyond

3 PRACTICES, 20+ YEARS

Insights, Advisory, Investments
Founded in 2002

200+ PROJECTS

Delivered across Public & Private sectors

15+ COUNTRIES

North America, Europe, Africa

50+ EXPERTS

Multidisciplinary and diverse
Permanent consulting staff

Our Platforms and Products

A digital platform for integrated strategy execution
and performance management

www.stratxe.com

A curated suite of tools, dashboards, and publications
to guide energy investment and policy decisions

[Energy Intelligence Hub](#)

PLEXOS is a powerful, flexible energy modelling
software for simulating, optimizing, and forecasting
electricity, gas, and other markets with precision

Our Impact

DRIVING RESULTS

We help our clients develop
contextually relevant strategy,
lifecycle execution through both
advisory & transaction support

CROSS-SECTOR FOCUS

Extensive track record with
Governments & SOCs, Private &
Listed Companies, and Funders &
Investors

NAVIGATING COMPLEXITY

Institutional development, capability building,
leadership development, and systems thinking
to drive clarity in uncertain environments
across Africa

CLIENTS

Since establishment, AIA has built its reputation and experience through delivering consistently to clients across various industries.

With a global outlook, AIA has established itself in both public and private sectors across Southern Africa through quality delivery and a bespoke approach to solution development.

Key industry experience includes Integrated Energy, Mining & Resources, Financial Services, Human Settlements, Construction & Industrial, Tourism & Conservation and across all Spheres of Government.

Our project work has included large scale Strategic and Organisational transformation work for clients who are sophisticated users of consultants.

*Non-exhaustive Selection of Clients

AGENDA

1. AIA Company Profile
- 2. Background and Context**
3. Approach and Methodology
4. Costing
5. Team

Problem definition

1

Vopak wishes to have an update of the liquid fuels market outlook and understand key opportunities for investment on the continent

2

Support required from AIA for the update of the market model and estimates for the 2026 year-end board session

3

Provide overview of potential market dynamics and potential opportunities in Africa, with specific focus on Namibia

Vopak requires assistance from AIA in preparation for the annual strategy board meeting, covering the following topics

1

Update long term supply & demand dynamics

- Update latest trends in vehicle sales mix, engine efficiency improvements, car park stats, diesel power generation outlook, road/rail transport split and economic growth.
- Outlook for jet fuel demand and supply
- Update of refinery supply (Secunda & SAPREF)
- Outlook for competing products – i.e. SAF, green hydrogen etc.

2

Update supply & competitor outlook

- Update developments regarding key players in the South African market
- Evaluate potential impact on competition and storage dynamics, especially in relation to other potential coastal terminals (i.e. Richards Bay & Walvis Bay) & inland logistics.
- Key players for the jet fuel market in SA

3

Provide high-level overview of Walvis Bay opportunity

- Update Board on the potential opportunity at Walvis Bay
- Outline the competitive landscape and market structure

4

Overview of broader African market

- Landscape overview of the African market encompassing:
 - Highlight key priority markets
 - Provide a view of the supply/demand balance of key bulk liquid markets for these priority markets
- Recommend markets that require further consideration

AGENDA

1. AIA Company Profile
2. Background and Context
- 3. Approach and Methodology**
4. Costing
5. Team

AIA will provide Vopak with annual market share forecasts, which serve as a strategic foundation for driving growth initiatives....

Analysis & Outlook

Insights

1 Diesel Demand

- Key drivers: GDP, vehicle efficiency, power generation and performance

2 Gasoline Demand

- Key drivers: GDP/capita, vehicle efficiency, price, EV sales

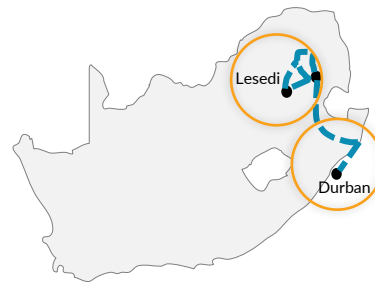

3 Jet fuel demand

- Drivers: GDP/capita, Flight departure

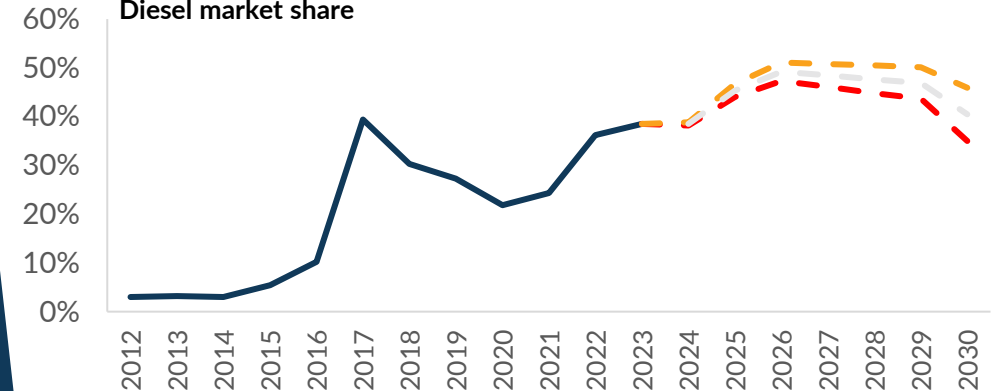

4 Static competitor analysis

- Neighboring countries
- New entrants into SA market

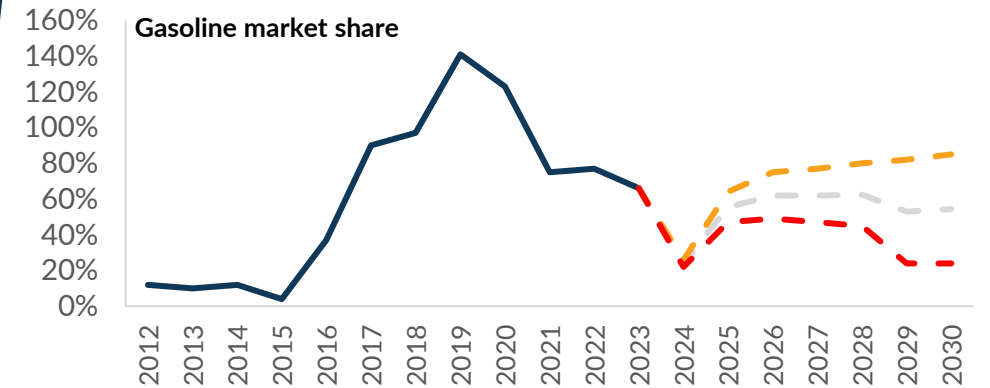

- Power generation modeling
- EV penetration forecasts
- Quantitative and qualitative supply analysis
- Freight transport modelling and analysis

Diesel market share

Gasoline market share

— Mid-point — Historic — Low imports — High imports

....as well as providing a strategic overview of the landscape in Namibia...

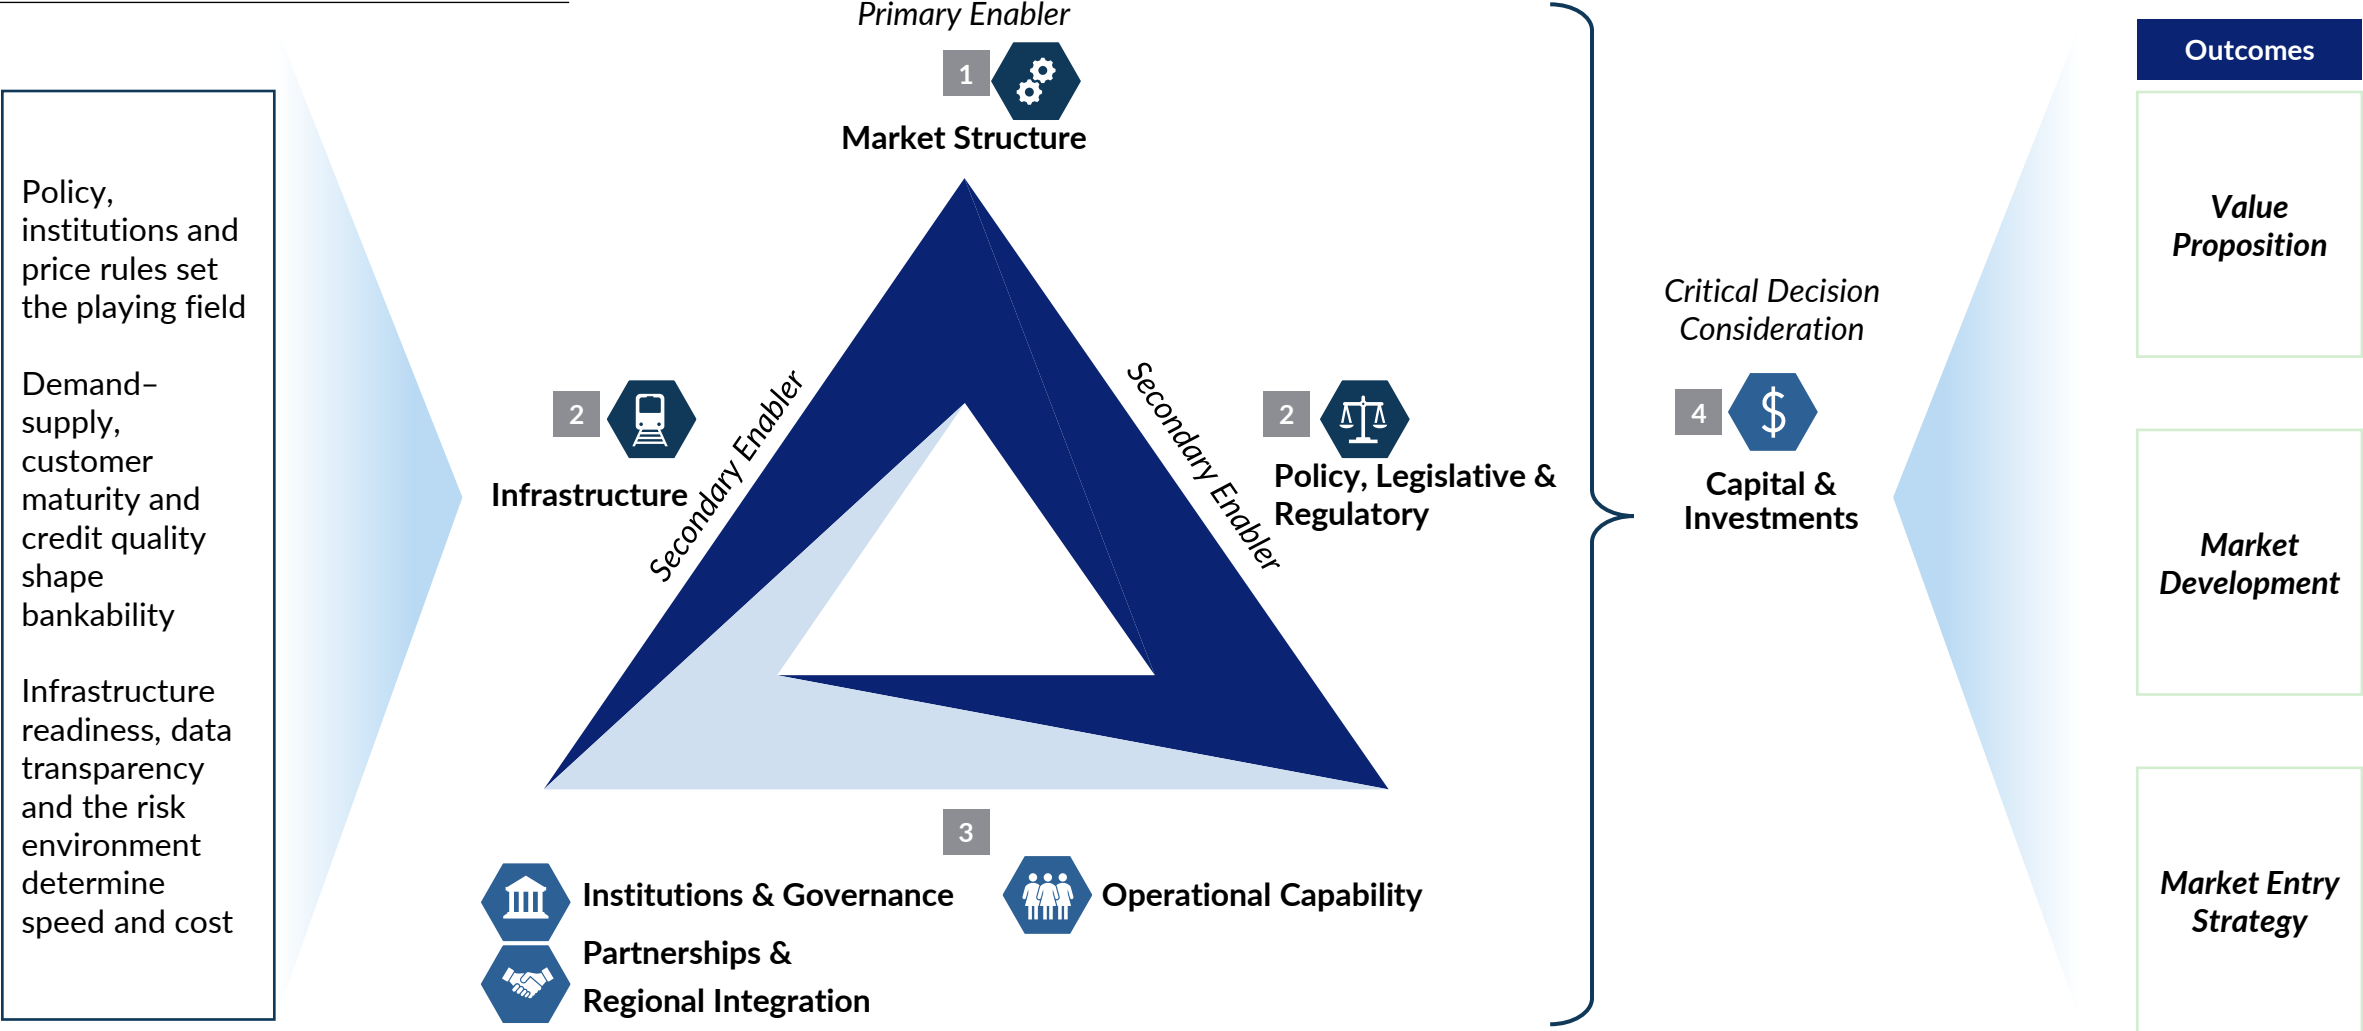

Namibia: Enabling Dimensions in detail

	Market Structure	Infrastructure	Policy, Legislative & Regulatory	Capital & Investments	Outcomes
- Namibia's fuel demand is import dependent and concentrated on Walvis Bay - A terminal position depends on the storage gap, the licensing route and the volume that can be contracted - The dimensions applied across Africa are read here in detail - Each is tested against the requirement for a high level of contracted commitment ahead of build, and a risk-averse jurisdictional appetite	- Import-dependent demand anchored in mining, fishing, marine bunkers and transport - LNG and chemicals demand emerging with the oil and gas programme - Storage held by a small number of incumbents	- Walvis Bay is the entry point and the corridor head for the region - Land, berth and pipeline access decide where a terminal can sit - Inland logistics reach the SADC corridor markets	- Ministry of Mines and Energy (MME) licensing governs import, storage and distribution - NAMCOR holds a central role in fuel imports - Local ownership expectations apply to foreign investors	- Volume that can be contracted ahead of build - Jurisdictional and counterparty risk - Entry route: greenfield, acquisition or joint venture	Value Proposition - Storage gap at Walvis Bay - Products and volumes in demand Market Development - Counterparties able to contract - Volume available to pre-commit Market Entry Strategy - Viable site and entry route - Conditions for a go decision
What our Namibian partner, Pombili Ndeunyema, adds to each					
	Volumes and growth plans of large end-users that published data does not carry	Port land, berth availability and Namport's own plans	How the licensing, ownership and participation rules are applied in practice	Which counterparties can credibly contract, and on what tenor	

....and market overview across Africa

Enabling Dimensions: Framework

Our team brings strategic, technical and analytical depth to support the Vopak board year-round

Core Delivery Team

Project Executive

Henry Gilfillan

Project Lead

Dr Davies Tsikayi

Delivery Support

Magamane Ledwaba

SME Advisory Support

Strategic Advisory

Pombili Ndeunyema

Overall, Team Responsibilities:

- Provide executive leadership and year-round strategic advisory support to the Vopak Board
- Analyse Africa's liquid-fuels market, with particular focus on Namibia
- Combine strategic, technical and analytical expertise with specialist SME input
- Develop a robust market outlook supported by practical industry insight
- Identify and assess commercially attractive investment opportunities
- Deliver integrated, decision-ready recommendations to support Vopak's strategic priorities

Our team has a blend of senior and analytical resources, balancing cost efficiency and project effectiveness

Executive Leadership & Project Governance

Henry Gilfillan
PROJECT EXECUTIVE

Henry Gilfillan

Bachelor of Accounting Sciences Honours

Henry is a Strategy Practice Leader at AIA. He has 20 years' experience in finance, strategy, business development and regulatory engagement in the energy and chemicals industries. He held senior (VP) positions in the areas of strategy, regulatory engagement and business development at South Africa's leading energy and chemicals company. During this time, he successfully led several multi-disciplinary teams on projects ranging from scenario and strategy development to the development of gas supply options for South Africa.

Dr Davies Tsikayi
PROJECT LEAD

Dr Davies Tsikayi

PhD Mechanical Engineering, MM in Energy Leadership

Dr Davies Tsikayi is an energy professional with 14 years of experience in engineering, research and consulting across the energy and petrochemical sectors. He combines deep technical expertise in energy modelling with strategic advisory experience, supporting organisations on energy strategy, policy, market analysis and infrastructure planning. His experience spans both domestic and international assignments, where he has delivered analytical insights to inform investment decisions, operational performance and long-term energy planning.

Dr Tsikayi has led and supported complex consulting assignments involving energy modelling, systems analysis and policy evaluation. As AIA's PLEXOS modelling specialist, he develops integrated power system models and data-driven analyses to support strategic decision-making. He is also a Lecturer at the Africa Energy Leadership Centre (Wits Business School), where he contributes to the development of future energy leaders through research, teaching and industry engagement. His combination of technical expertise and strategic insight enables him to translate complex engineering challenges into practical, evidence-based solutions.

Our team includes localised expertise offering context on regional trends, regulations and operational dynamics

Specialist Advisory

Pombili Ndeunyema
STRATEGIC ADVISORY

Pombili Ndeunyema

MBA, BSc (Hons) Mechanical Engineering, Pr. Eng (Namibia)

Pombili Ndeunyema is a Registered Professional Engineer with over 14 years of leadership, strategy and stakeholder engagement experience across Namibia's public and private sectors. He combines executive leadership in the mining industry with consulting experience advising government institutions and state-owned enterprises on strategy, organisational development and institutional reform.

Pombili has led strategy development, organisational design and stakeholder engagement assignments involving senior government officials, executive management and boards. His experience includes strategic planning, governance reviews and institutional assessments for the Ministry of Public Enterprises, National Planning Commission, Namibia Institute of Pathology, Meat Corporation of Namibia and Oshakati Premier Electric. His facilitation and leadership experience enables him to build consensus across diverse stakeholders and translate strategy into practical organisational outcomes.

Delivery Support

Magamane Ledwaba
SENIOR CONSULTANT

Magamane Ledwaba

BEng Mechatronics Engineering

Magamane Ledwaba is a Mechatronics Engineering graduate with experience in data analysis, control systems and engineering consulting. His technical background combines analytical modelling, computational intelligence and systems engineering with practical exposure to infrastructure and mechanical consulting projects. He has supported engineering assignments involving HVAC validation, fire safety compliance, tender evaluations and technical assessments for clients including Airports Company South Africa (ACSA) and Eskom. His analytical capability enables him to assess complex technical information and contribute to evidence-based decision-making and problem solving..
